Mr Clerk,

Please dont loosen environmental protection and give Dynegy permission to pollute even more than they already do! This is a moral issue. We cannot burden our children and grandchildren with the total responsibility for clean up and global warming mitigation! This is penny wise, (save money for dynegy), and pound foolish! There are many jobs to be had in clean energy, it is well passed time to stop dirty energy and switch to clean energy. At the very least, in the meantime we MUST continue to uphold the strictest of clean air standards as mandated by law.. The future of the planet is dependent upon it.

Thank you,
Kathryn Franke
Warrenville, IL
