

RECEIVED
CLERK'S OFFICE

JAN 25 2018

STATE OF ILLINOIS
Pollution Control Board

Mrs. Tippard,

I am 82 years old and the air is cleaner than any-time in my life. As a child the factories burned coal, homes were heated with coal, and the many locomotives used coal. A few days after a snow, ~~snow~~^{soot} would become visible. I think the scrubbers and present equipment are doing a good job. We live about 10 miles from the two power plants near Pekin. Lets try to keep the electric rates as economical as possible.

Sincerely,

William Uhlman

16 Meadowbrook Ln.
