Subject: [External] DON'T POLLUTE THE AIR IN ILLINOIS Protect Illinois" air: R2018-20, Amendments to 35 Ill. Adm. Code 225.233
Date: Saturday, April 7, 2018 1:29:33 PM

Dear IL Pollution Control Board Assistant Clerk,

We only have one world if anything happens, there is no second chances!
People with breathing problem like me with Asthma, we can handle anymore pollution..so don't add anymore....
Illinois Environmental Protection Agency and Dynegy's proposal to amend the Multi Pollutant Standard (MPS) is unnessecary and would give Dynegy the option to increase air pollution (NOx and SO2) at certain individual Dynegy plants. The proposal includes Baldwin, Coffeen, Duck Creek, Edwards, Havana, Hennepin, Joppa, and Newton coal fired power plants. Any increase in pollution would place an undue public health burden on the communities surrounding the plants and the people who live there.

A high number of Dynegy's plants are located in Environmental Justice communities so a potential increase in NOx and SO2 pollution from individual Dynegy plants presents Environmental Justice concerns. Both pose serious health risks, especially for vulnerable community members like infants and small children, the elderly, and asthmatics.

For these reasons, the Illinois Pollution Control Board should reject the regulatory changes that the Illinois Environmental Protection Agency and Dynegy are proposing.

Sincerely,

Kimberly A Prochaska
