Dear Pollution Control Board Hearing Officer Marie Tipsord,

I am deeply troubled by the Illinois EPA's proposal to rewrite the state's Multi-Pollutant Standard which would allow Dynegy's Illinois coal plants to immediately begin polluting more. I am writing to strongly urge the Pollution Control Board to reject this dangerous proposal which would weaken clean air standards in Illinois and result in more soot and acid rain.

Since this proposal was first introduced, Dynegy merged with Texas-based Vistra Energy and created an energy goliath worth billions of dollars. This is clearly not a company on the verge of collapse and in need of a bailout of any kind! The company's motivation for seeking the proposed rule change through the Illinois EPA is solely to maximize its profits. Why should this out-of-state company get a pollution bailout that puts corporate profits over air quality in Illinois?

The Pollution Control Board must reject this dangerous proposal and stand up for clean air in Illinois, not more corporate profits.

Regards,  
Diane Schrum

Since this proposal was first introduced, Dynegy merged with Texas-based Vistra Energy and created an energy goliath worth billions of dollars. This is clearly not a company on the verge of collapse and in need of a bailout of any kind! The company's motivation for seeking the proposed rule change through the Illinois EPA is solely to maximize its profits. Why should this out-of-state company get a pollution bailout that puts corporate profits over air quality in Illinois?

The Pollution Control Board must reject this dangerous proposal and stand up for clean air in Illinois, not more corporate profits.

Dear Pollution Control Board Hearing Officer Marie Tipsord,

I am deeply troubled by the Illinois EPA's proposal to rewrite the state's Multi-Pollutant Standard which would allow Dynegy's Illinois coal plants to immediately begin polluting more. I am writing to strongly urge the Pollution Control Board to reject this dangerous proposal which would weaken clean air standards in Illinois and result in more soot and acid rain.

Since this proposal was first introduced, Dynegy merged with Texas-based Vistra Energy and created an energy goliath worth billions of dollars. This is clearly not a company on the verge of collapse and in need of a bailout of any kind! The company's motivation for seeking the proposed rule change through the Illinois EPA is solely to maximize its profits. Why should this out-of-state company get a pollution bailout that puts corporate profits over air quality in Illinois?

The Pollution Control Board must reject this dangerous proposal and stand up for clean air in Illinois, not more corporate profits.

**Reply-To:** [nicolai.schousboe@comcast.net](mailto:nicolai.schousboe@comcast.net)

Dear Pollution Control Board Hearing Officer Marie Tipsord,

I am deeply troubled by the Illinois EPA's proposal to rewrite the state's Multi-Pollutant Standard which would allow Dynegy's Illinois coal plants to immediately begin polluting more. I am writing to strongly urge the Pollution Control Board to reject this dangerous proposal which would weaken clean air standards in Illinois and result in more soot and acid rain.

Since this proposal was first introduced, Dynegy merged with Texas-based Vistra Energy and created an energy goliath worth billions of dollars. This is clearly not a company on the verge of collapse and in need of a bailout of any kind! The company's motivation for seeking the proposed rule change through the Illinois EPA is solely to maximize its profits. Why should this out-of-state company get a pollution bailout that puts corporate profits over air quality in Illinois?

The Pollution Control Board must reject this dangerous proposal and stand up for clean air in Illinois, not more corporate profits.

Regards,  
Nicolai Schousboe

---

Dear Illinois Pollution Control Board Hearing Officer,

Illinois Environmental Protection Agency and Dynege's proposal to amend the Multi Pollutant Standard (MPS) is unnessecary and would give Dynege the option to increase air pollution (NOx and SO2) at certain individual Dynege plants. The proposal includes Baldwin, Coffeen, Duck Creek, Edwards, Havana, Hennepin, Joppa, and Newton coal fired power plants. Any increase in pollution would place an undue public health burden on the communities surrounding the plants and the people who live there.

A high number of Dynege's plants are located in Environmental Justice communities so a potential increase in NOx and SO2 pollution from individual Dynege plants presents Environmental Justice concerns. Both pose serious health risks, especially for vulnerable community members like infants and small children, the elderly, and asthmatics.

For these reasons, the Illinois Pollution Control Board should reject the regulatory changes that the Illinois Environmental Protection Agency and Dynege are proposing.

Sincerely,

Molly Lowe

This is clearly not a company on the verge of collapse and in need of a bailout of any kind! The company's motivation for seeking the proposed rule change through the Illinois EPA is solely to maximize its profits. Why should this out-of-state company get a pollution bailout that puts corporate profits over air quality in Illinois?

The Pollution Control Board must reject this dangerous proposal and stand up for clean air in Illinois, not more corporate profits.

Dear Pollution Control Board Hearing Officer Marie Tipsord,

I am deeply troubled by the Illinois EPA's proposal to rewrite the state's Multi-Pollutant Standard which would allow Dynegy's Illinois coal plants to immediately begin polluting more. I am writing to strongly urge the Pollution Control Board to reject this dangerous proposal which would weaken clean air standards in Illinois and result in more soot and acid rain.

Since this proposal was first introduced, Dynegy merged with Texas-based Vistra Energy and created an energy goliath worth billions of dollars. This is clearly not a company on the verge of collapse and in need of a bailout of any kind! The company's motivation for seeking the proposed rule change through the Illinois EPA is solely to maximize its profits. Why should this out-of-state company get a pollution bailout that puts corporate profits over air quality in Illinois?

The Pollution Control Board must reject this dangerous proposal and stand up for clean air in Illinois, not more corporate profits.

The Pollution Control Board must reject this dangerous proposal and stand up for clean air in Illinois, not more corporate profits.

Since this is Illinois though, I can expect corruption to continue in the this state. Lobbyists pay politicians to vote for their agenda regardless if it's wrong and that's truly sad. Money is more important than people according to politicians. 5 year olds know the difference between right and wrong. I suggest common sense is followed. The environment is already destroyed in every way possible; people are working to make it better and yet companies are still ignoring the science supporting a clean environment. I think it's too bad I can just dump waste into the backyards of politicians; let them live with what they vote for.
