)

**AMENDED RECOMMENDATION OF THE ILLINOIS
ENVIRONMENTAL PROTECTION AGENCY**

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its Amended Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board ("Board"), 35 Ill. Adm. Code 125.204.

1. On August 10, 2018, the Illinois EPA filed its Recommendation for Approval in the above matter.
2. In the Illinois EPA Recommendation, it stated that the livestock waste handling facility had "one perimeter drainage pipe (4 in. dia.) located around the footing of manure pit to prevent flotation of the pit." See Illinois EPA Recommendation ¶ 2.
3. The "Watershed Unit Tax Certification Review Sheet" in Exhibit A stated that there was a "plastic perimeter drainage tile around the pit (approximately 536 ft. x 4 in.).
4. The length of the plastic perimeter tile was reported incorrectly. The length of Forma Drain tile around the livestock waste handling facility is 1,150 feet.
5. Therefore, we ask that the previously reported length of tile, 536 feet, be disregarded, and the Board use the correctly reported length, 1,150 feet in their determination.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.
