Table 1: Federal Amendments That Are Not Necessary in This Docket

40 C.F.R. § 257.1

40 C.F.R. § 257.2

There is no counterpart to this provision in the Illinois regulations, since 40 C.F.R. 257 is outside the scope of the Board's identical-in-substance mandates.

40 C.F.R. 257, subpart B

There is no counterpart to this provision in the Illinois regulations, since 40 C.F.R. 257 is outside the scope of the Board's identical-in-substance mandates.

40 C.F.R. § 257.5

40 C.F.R. 258.3, "construction and demolition (C&D) landfill

There is no counterpart to this definition in the Illinois regulations.

Note: USEPA added the definition with rules for disposal of residential lead-based paint waste. *See* 68 Fed. Reg. 36487, 36495 (June 18, 2003). The Agency persuaded the Board to omit the definition in <u>RCRA Subtitle D Update, USEPA Amendments (January 1, 2003 through June 30, 2003)</u>, R04-5, <u>RCRA Subtitle D Update, USEPA Amendments (July 1, 2003 through December 31, 2003)</u>, R04-15 (June 17, 2004), slip op. at pp.4-10. Since, the General Assembly established a definition of "general construction and demolition debris" in section 3.160 of the Act. *See* P.A. 90-475, § 5, effective August 17, 1997 (adopted as section 3.78a and later amended, recodified as section 3.160 and amended several times). These definitions embrace many of the same materials, but they are not sufficiently similar that the Board should incorporate the federal definition, as revised, into the Illinois RCRA Subtitle D rules.

<u>40 C.F.R. 260.10, "AES filing compliance date"</u>
Establishing December 31, 2017 as the AES filing compliance date obviates this definition, allowing direct substitution with the date or dropping introductory clauses using the term. *See* 82 Fed. Reg. 41015 (Aug. 29, 2017). See the entries for 35 Ill. Adm. Code 721.139(a)(5)(E)(ii) and (a)(5)(K), 722.183(a)(6) and (g), and 723.120(g)(4) in Table 2 below.

<u>40 C.F.R. 260.10, "Performance Track member facility"</u>
USEPA terminated the Performance Track Program in 2009. *See* 74 Fed. Reg. 22741 (May 14, 2009). The Board removed the definition and provisions relating to the Performance Track program in <u>RCRA Subtitle C Update, USEPA Amendments (January 1, 2010 through June 30, 2010)</u>, R11-2, <u>RCRA Subtitle C Update, USEPA Amendments (July 1, 2010 through December 31, 2010)</u>, R11-16 (Aug. 18, 2011).

<u>40 C.F.R. 262.10(d)</u>
The amendment at 81 Fed. Reg. 85732, 65807 (Nov. 28, 2016) obviated the amendment at 81 Fed. Reg. 85696, 85715 (Nov. 28, 2016); retained the singular "waste." See the entry in Table 2 below.

<u>40 C.F.R. 262.12(d)</u>
The removal of 40 C.F.R. § 262.12 at 81 Fed. Reg. 85732, 85808 (Nov. 28, 2016) obviates the addition of § 262.12(d) at 81 Fed. Reg. 85696, 85715 (Nov. 28, 2016).

<u>40 C.F.R. 262.41(b)</u>
The amendment and movement of text into 40 C.F.R. § 262.41(c) at 81 Fed. Reg. 85732, 85819 (Nov. 28, 2016) obviates the amendment of § 262.41(b) at 81 Fed. Reg. 85696, 85715 (Nov. 28, 2016). See the entry in Table 2 below.

<u>40 C.F.R. 262.43</u>
The amendment to remove the masculine pronoun was not needed because the Illinois rule refers to the Agency, rather than the Administrator of USEPA. The correction of the federal statutory references was not necessary because the Illinois rule refers to the Act, rather than RCRA.

<u>40 C.F.R. 262, subpart I</u>
The Illinois rules do not include an equivalent to Subpart I because the contained federal provisions do not apply to any facility in Illinois.

40 C.F.R. 262, subpart J

The Illinois rules do not include an equivalent to Subpart I because the contained federal provisions do not apply to any facility in Illinois.

40 C.F.R. 262.206(b)(3)(iii)

The Board changed the ending period to a colon when incorporating the provision into the Illinois rules in RCRA Subtitle C Update, USEPA Amendments (July 1, 2008 through December 31, 2008 and June 15, 2010), R09-16 and RCRA Subtitle C Update, USEPA Amendments (January 1, 2009 through June 30, 2009), R10-4 (Oct. 7, 2010).

40 C.F.R. 262.213(a)(1)

See the entry for 40 C.F.R. 260.10, "Performance Track member facility" above in this Table 1.

40 C.F.R. 265.15(b) and (b)(5)

See the entry for 40 C.F.R. 260.10, "Performance Track member facility" above in this Table 1.

40 C.F.R. 265.1101(c)(4)

See the entry for 40 C.F.R. 260.10, "Performance Track member facility" above in this Table 1.

40 C.F.R. 266.170(b)(3)

Changing "§§ 263.20 and 263.21" to "40 CFR 263.20 and 263.21" and "§§ 263.71 and 263.72" to "40 CFR 263.71 and 263.72" was not necessary.

Note: USEPA stated as follows in the *Federal Register* discussion of the last sentence in this provision:

> If the LQG is consolidating incoming hazardous waste from a VSQG with either its own hazardous waste or with hazardous waste from another VSQG, the LQG must mark each container with the earliest date any hazardous waste in the container was accumulated on site. This will prevent an LQG from starting the accumulation clock over again, which could lead to an endless loop of accumulation. 81 Fed. Reg. 85732, 85775 (Nov. 28, 2016).

The intended accumulation start date is when the VSQG began accumulating waste in the container on the VSQG's site. The Board has revised the provision to active-voice, placing "accumulated on site" in a position associated with "VSQG," instead of "in the container."

See the entry in Table 3 below.

Note: USEPA changed the reporting from annual to biennial in 1983. *See* 48 Fed Reg. 3977 (Jan. 28, 1983). The Board opted to retain annual reporting in place of biennial reporting and used "on a form provided by the Agency" in place of "EPA Form 8700-13" in RCRA and UIC Update, R84-9 (June 13, 1985), slip op. at 4-5. The Board proposed changing from annual to biennial reporting to correspond with the federal requirement but deferred doing so in UIC Update, USEPA Amendments (July 1, 2005 through December 31, 2005), R06-16, RCRA Subtitle D Update, USEPA Amendments (July 1, 2005 through December 31, 2005), R06-17, and RCRA Subtitle C Update, USEPA Amendments (July 1, 2005 through December 31, 2005 and March 23, 2006), R06-18 (Nov. 16, 2006), slip op. at 35-36. The Agency persuaded the Board to retain annual reporting, for the sake of consistency with statutory reporting requirements (*see* 415 ILCS 5/20.1 (2016)) and required annual updates to financial assurance (*see* 35 Ill. Adm. Code 727.240(c)), in RCRA Subtitle C Update, USEPA Amendments (March 5, 2005, September 8, 2005, and January 1, 2006 through June 30, 2006), R07-5 and RCRA Subtitle C Update, USEPA Amendments (July 1, 2006 through December 31, 2006), R07-14 (June 5, 2008), slip op. at 10-12. This prompts the Board to omit the USEPA amendments particular to biennial reporting.

Changed "a large quantity generator" to the defined acronym "an LQG"; changed "an odd-numbered year" to "any calendar year"; changed "who treats, stores, or disposes of hazardous waste" to "treating, storing, or disposing of hazardous waste"; omitted "EPA Form 8700–13 A/B"; changed "to the Regional Administrator" to "to the Agency"; changed " changed "the following even-numbered year" to "the following year"; added "on a form provided by the Agency" after "annual report"; changed "large quantity generators that receive" to the singular defined acronym "an LQG that receives"; changed "very small quantity generators" to the singular defined acronym "a VSQG." Note: This provision derived from the original consolidated permit rules adopted by USEPA at 48 Fed. Reg. 14146 (Apr. 1, 1983). The Board codified the general provisions of 40 C.F.R. 122 in 35 Ill. Adm. Code 702, the RCRA-specific provisions in 35 Ill. Adm. Code 703, and the UIC-specific provisions in 35 Ill. Adm. Code 704. USEPA deconsolidated the permit rules in 1983. 48 Fed. Reg. 14146 (Apr. 1, 1983). The RCRA-specific requirement for facility owner information became 40 C.F.R. § 270.13(e) (1983), which corresponds with 35 Ill. Adm. Code 703.181(b). The Board did not deconsolidate the permit rules or change the attribution of 35 Ill. Adm. Code 702.123. In R84-9 (June 13, 1985), the Board added a requirement for owner information at 35 Ill. Adm. Code 702.123(e) and revised the Board note, attributing 35 Ill. Adm. Code 702.123 to 40 C.F.R. §§ 144.31(e), 270.10(d), and 270.13 without explanation. In R11-14 (Jan. 5, 2012), the Board replaced the owner information requirement at 35 Ill. Adm. Code 702.123(e) with an explanatory statement, explaining that the RCRA-specific rule at 35 Ill. Adm. Code 703.181(b), derived from 40 C.F.R. § 270.13(e), requires owner information.

    Past date: October 12, 2005
    Function of date/provision: The owner or operator was required to submit a notice of intent to comply to obtain a permit modification to install emissions control equipment needed to comply with the Phase II NESHAPs that USEPA adopted on the date. While it is possible that 40 C.F.R. § 270.42(j)(2) is obsolete, it is likely that removing subsection (j)(2) would affect the scope of the Illinois hazardous waste rules.
    Disposition: Retained.

35 Ill. Adm. Code 703.320(c)

Past date: October 12, 2005

Function of date/provision: A hazardous waste incinerator, cement kiln, lightweight aggregate kiln, solid fuel boiler, liquid fuel boiler, or hydrochloric acid production furnace unit that becomes subject to RCRA Subtitle C permit requirements after the date must comply with the Phase II NESHAPs during startup, shutdown, and malfunction events. Affected units were required to comply since the date, and it is likely that this provision's remaining vitality is limited to units that become subject to RCRA Subtitle C permit requirements on an ongoing basis. The date would have no effect as to those units. Removal of the date will have no effect on the scope of the rule.

Disposition: Date deleted.

35 Ill. Adm. Code 704.141(a)(1)

Past date: March 3, 1984

Function of date/provision: The owner or operator of a Class I or Class III well was authorized by rule if it injected into the well within one year after the date. However, the owner or operator of an existing injection well was required by 35 Ill. Adm. Code 704.161(b)(1) to submit a permit application no later than March 3, 1986. Continued injection into the wall was prohibited after March 3, 1989 by 35 Ill. Adm. Code 704.142(h), unless the owner or operator had a permit application pending Agency decision. It is unlikely that any permit application would still be pending after so long a time. Removal of the entire Section would not affect the scope of the Illinois underground injection control rules.

Disposition: Entire provision deleted.

35 Ill. Adm. Code 704.142(h)

Past date: March 3, 1989

Function of date/provision: Authorization of injection into a Class I or Class III injection well was prohibited after the date unless the owner or operator submitted a complete permit application to the Agency and the Agency decision was pending. It is unlikely that any permit application would still be pending after so long a time. Removal of the provision would not affect the scope of the Illinois underground injection control rules.

Disposition: Entire provision deleted.

35 Ill. Adm. Code 704.145(b)(2)

Past date: September 27, 1986

Function of date/provision: By the date, the owner or operator of a Class IV injection well was to submit a plan to plugging or otherwise closing and abandoning the well. Removal to the past date will not affect the scope of the Illinois underground injection control rules. Removal of the entire provision might affect the scope, since it is possible the a Class IV well continues to operate in Illinois as allowed by subsection (c). Further, it is likely that the requirements of subsection (b) would apply to those injection wells. *See* 35 Ill. Adm. Code 704.124(c) and (d).

Disposition: Date deleted.

35 Ill. Adm. Code 704.148 preamble and 704.148(d)

Past date: March 3, 1985

Function of date/provision: Only Class IV and Class V injection wells are within the scope of wells regulated by Board rules under this provision, as per subsection (b)(1). The owner or operator of an injection well was to submit inventory information to the Agency before the date in subsection (d). If the owner or operator failed to timely submit the information, injection into the well was prohibited. Per subsection (d), the date does not apply to any well that had RCRA interim status. Removal of the reference to a deadline and the past effective date is possible without affecting the scope of the Illinois underground injection control rules. It is not certain that removing the requirement to submit inventory information (without the date) and removing the statement about RCRA interim status facilities would not affect the scope of the rules. See the entry for 35 Ill. Adm. Code 704.148(e) and (e)(1) below in this Table 4.

Disposition: Entire text of subsection (d) deleted; viable requirement from subsection (e)(3) moved into subsection (d).

35 Ill. Adm. Code 704.148(e) and (e)(1)

Past date: March 3, 1985

Function of date/provision: The owner or operator of a Class V injection well in operation before the date that did not submit inventory information before the deadline of subsection (d) was to cease injection. The date defines a first group of existing Class V injection wells. The owner or operator could resume injection 90 days after submitting the inventory information, unless notified otherwise by the Agency. Removing subsections (e)(1) and (e)(2) and the date references from subsections (e)(3) and (e)(4), moving the requirement to submit inventory information before beginning injection from subsection (e)(3) into subsection (d), and moving the prohibition against injection upon failure to submit inventory information and provision for resuming injection after submission from subsection (e)(4) into subsection (e) will preserve all potentially viable elements of subsection (e) without affecting the scope of the Illinois underground injection control rules.

Disposition: Entire text of subsections (e) and (e)(1) deleted; viable requirement from subsection (e)(4) moved into subsection (e).

35 Ill. Adm. Code 704.148(e)(2)

Past date: May 2, 1985

Function of date/provision: The date defines a second group of existing Class V injection wells. See the entry for 35 Ill. Adm. Code 704.148(e) and (e)(1) above in this Table 4.

Disposition: Entire provision deleted.

35 Ill. Adm. Code 704.148(e)(2)

Past date: May 2, 1995

Function of date/provision: The owner or operator of a Class V injection well in the second group was to submit inventory information before the date. See the entry for 35 Ill. Adm. Code 704.148(e) and (e)(1) above in this Table 4.

Disposition: Entire provision deleted.

35 Ill. Adm. Code 704.148(e)(3)

 Past date: May 2, 1994

 Function of date/provision: The date defines a third group of existing Class V injection wells. The owner or operator of a Class V injection well that began injection after the date was to submit inventory information before beginning injection. See the entry for 35 Ill. Adm. Code 704.148(e) and (e)(1) below in this Table 4.

 Disposition: Date deleted; substantive elements moved into subsection (d).

35 Ill. Adm. Code 704.148(e)(4) Board note

 Past date: The applicable of the dates in subsection (e)(2) or (e)(3)

 Function of date/provision: The owner or operator of a Class V well in either of the second or third groups that failed to comply with the applicable deadline could resume injection 90 days after submitting inventory information. See the entry for 35 Ill. Adm. Code 704.148(e) and (e)(1) below in this Table 4.

 Disposition: Date references deleted; substantive requirement moved into subsection (e).

35 Ill. Adm. Code 704.150(d)(2)

 Past date: March 3, 1985 (twice)

 Function of date/provision: The owner or operator of a Class I or Class III injection well was to submit proof of financial assurance no later than the date. If operational control of the well transfers after the date, the transferee must submit proof of financial assurance with the required notice of transfer. Removal of the past date (both occurrences) will not affect the scope of the Illinois underground injection control rules. It is likely that removing the entire provision could make the Illinois rule less stringent than its federal counterpart.

 Disposition: Date deleted (twice).

35 Ill. Adm. Code 704.161(b)(1)(B)

 Past date: August 1, 1984

 Function of date/provision: The owner or operator injecting off-site-generated hazardous waste into a well was to submit a permit application before the date. See the entry for 35 Ill. Adm. Code 704.161(b)(1)(C) below in this Table 4.

 Disposition: Deleted the entire provision.

35 Ill. Adm. Code 704.161(b)(1)(C)

 Past date: March 3, 1986

 Function of date/provision: Unless the Agency had requested an application for permit, as provided by subsection (b)(1)(A), or the permit application was required by the date in subsection (b)(1)(B), the owner or operator was to submit the application before this date. The application for an existing well was required by one of the long-past dates in this subsection (b)(1). The latest date is that in this subsection (b)(1)(C). Removing the entire text of subsection (b)(1) will not affect the scope of the Illinois underground injection control rules. The removal will require restructuring subsection (b) to accommodate still-viable text from subsection (b)(2). See the entry for 35 Ill. Adm. Code 704.161(b) in Table 3 above.

 Disposition: Deleted the entire provision.

35 Ill. Adm. Code 704.202
>
> Past date: August 2, 1984

35 Ill. Adm. Code 704.287(b)(1)

Past date: January 1, 2004

Function of date/provision: USEPA required the State to complete all local assessments for groundwater protection by the date. If the State failed to do so, various requirements applied. Subsection (b)(1)(A) gave a deadline for well closure or the requirement to have a permit for motor vehicle waste disposal wells outside areas with completed groundwater assessments. Subsection (b)(1)(B) provided for the State obtaining an extended deadline to complete groundwater assessments and provided a deadline for well closure or the requirement to have a permit for motor vehicle waste disposal wells outside areas with completed groundwater assessments. Subsection (b)(2) authorized the Agency to extend the time for well closure up to one year if the most efficient compliance option was to connect to a sanitary sewer or install new treatment technology. All of the dates and times for extensions are long past. Removing subsections (b), (b)(1)(A), (b)(1)(B), and (b)(2) and the Board note appended to subsection (b)(2) will not affect the scope of the Illinois underground injection control rules. See the entries for 35 Ill. Adm. Code 704.187(b) and Board note in Table 3 above.

Disposition: Deleted subsection (b) in its entirety.

35 Ill. Adm. Code 704.287(b)(1)(A)

Past date: January 1, 2005

Function of date/provision: If the State did not complete groundwater assessments before the date in subsection (b)(1), the owner or operator of a motor vehicle waste disposal well outside the areas of completed groundwater assessments was to close the well or obtain a permit before the date. See the entry for 35 Ill. Adm. Code 704.287(b)(1) above in this Table 4.

Disposition: Deleted subsection (b) in its entirety.

35 Ill. Adm. Code 704.287(b)(1)(B)

Past date: January 1, 2004

Function of date/provision: USEPA could grant the State an extension up to one year after the date if the State was making reasonable progress toward completing groundwater assessments. See the entry for 35 Ill. Adm. Code 704.287(b)(1) above in this Table 4.

Disposition: Deleted subsection (b) in its entirety.

35 Ill. Adm. Code 704.287(b)(1)(B)

Past date: June 1, 2003

35 Ill. Adm. Code 704.287(b)(1)(B)

Past date: January 1, 2006

Function of date/provision: If the State failed to meet the extended deadline, the owner or operator of a motor vehicle waste disposal well was to closed its well or obtain a permit by the date. See the entry for 35 Ill. Adm. Code 704.287(b)(1) above in this Table 4.

Disposition: Deleted subsection (b) in its entirety.

    Past date: January 1, 2007 (first)
    Function of date/provision: The owner or operator of a motor vehicle waste disposal well in "another sensitive groundwater area" was to close the well or obtain a permit before the date. This subsection (c) provides for State identification of "other sensitive groundwater areas," including various deadlines for State action and compliance deadlines for motor vehicle waste disposal wells. All dates are past. Removing subsection (c) and its appended Board note will not affect the scope of the Illinois underground injection control rules. See the entry for 35 Ill. Adm. Code 704.287(c) in Table 3 above.

35 Ill. Adm. Code 704.288(a)(1)
    Past date: April 5, 2000
    Function of date/provision: A large-capacity cesspool in operation or under construction by the date is an existing cesspool to which requirements apply. Since subsection (a)(1)(A) required closure of existing large-capacity cesspools and subsection (a)(2) prohibits new large-capacity cesspools, large-capacity cesspools are no allowed. A statement of prohibition in subsection (a) against large-capacity cesspools will allow removing all of subsections (a)(1), (a)1)(A), (a)(1)(B), and (a)(2) without affecting the scope of the Illinois underground injection control rules. See the entry for 35 Ill. Adm. Code 704.288(a) in Table 3 above.

    Past date: Date of completion of source water assessment
    Function of date/provision: The owner or operator of a motor vehicle waste disposal well in a groundwater protection area must close the well or obtain a permit within one year of the date. A one-year extension of the closure date is possible if the most efficient compliance option was to connect to a sanitary sewer or install new treatment technology. It is possible that an existing motor vehicle waste disposal well will become subject to an assessment that will place it in a groundwater protection area. Removing the date could affect the scope of the Illinois underground injection control rules.

Removing the date will not affect the scope of the Illinois underground injection control rules. However, it is possible that an existing motor vehicle waste disposal well will become subject to an assessment that will place it in an other sensitive groundwater area. Removing the provision could affect the scope of the Illinois underground injection control rules.

Subsection (c)(7)(A)(ii) allowed continued limited burning for the purpose of certifying compliance, but the owner or operator was to submit the certification by a date now long past. The Board never granted any variance pursuant to 35 Ill. Adm. Code 726.219 (corresponding with 40 C.F.R. § 266.103(c)(7)(ii)) to grant a case-by-case extension of time. While it may be possible that an interim status facility continues to operate by virtue of having timely certified compliance, it is not possible that a facility that failed to do certify compliance still operates under interim status in Illinois. Removing the text subsection (c) would be possible were it not possible that an interim status facility that timely certified compliance continues to operate under this provision in Illinois. Subsection (c)(8) provides for revised certification of compliance in the event of operational changes, and subsection (d) requires periodic recertification. Both rely on the procedure and informational requirements of subsections (c) through (c)(6). The extension of time allowed by subsection (c)(7) relates only to the deadline in subsection (c). To avoid inconsistency with the corresponding federal rule, the Board limits revising subsection (c) to removing the past dates and the text limited in scope to stating the consequences of failing to meet those past deadlines. While most of subsection (c)(7) is obsolete, the Board retains those portions of subsections (c)(7)(A) and (c)(7)(A)(i) that required cessation of burning and beginning facility closure.
Disposition: Dates deleted.

See the entry for 35 Ill. Adm. Code 726.203(c) above in this Table 4.

Disposition: Provision deleted.

35 Ill. Adm. Code 726.203(c)(7)(A)(ii)
> Past date: August 23, 1993
> Function of date/provision: An owner or operator of an existing facility operating under interim status that failed to timely certify compliance before a prior date that submitted a timely notification to the Agency was to submit a complete certification of compliance by the date. See the entry for 35 Ill. Adm. Code 726.203(c) above in this Table 4.
> Disposition: Provision deleted.

35 Ill. Adm. Code 726.211(e)(1)(B)
> Past date: August 21, 1993
> Function of date/provision: The owner or operator of existing direct transfer equipment was to comply with secondary containment requirements by the date. Removal of the past effective date will not affect the scope of the Illinois RCRA Subtitle C rule if the requirement that new and existing equipment must comply is retained.
> Disposition: Date deleted and provision reorganized.

35 Ill. Adm. Code 726.211(e)(2)(A)
> Past date: August 21, 1993
> Function of date/provision: The owner or operator was to perform an assessment of the integrity of all direct transfer equipment that did not have secondary containment before the date. Removal of the past effective date will not affect the scope of the Illinois RCRA Subtitle C rule.
> Disposition: Date deleted.

35 Ill. Adm. Code 726.303(c)
> Past date: November 8, 1995
> Function of date/provision: The Department of Defense forms were limited to the versions that existed on the date. Any updates to the forms, however supersede prior versions, and military personnel will be required to use later versions. Removal of the past date is necessary, and the Board will need to periodically locate later versions and update incorporations by reference to maintain an enforceable rule.
> Disposition: Date deleted. See the entries for 35 Ill. Adm. Code 720.111(a), USDOD and 726.303(c) in Table 3 above.

35 Ill. Adm. Code 726.330(a)
> Past date: July 21, 2002
> Function of date/provision: The owner or operator was to notify the Agency before the later of July 21, 2002 or 90 days after first using a storage unit for conditionally exempt low-level mixed waste. Removal of the past effective date will not affect the scope of the Illinois RCRA Subtitle C rule.
> Disposition: Date deleted.

35 Ill. Adm. Code 726.360
> Past date: April 22, 2002 (first)
> Function of date/provision: A storage unit that was used to store only LLMW before the date and which after the date stores only LLMW that becomes exempt is not subject to closure requirements. Removing the date would make the Illinois RCRA Subtitle C rule more stringent as applied to existing facilities.
> Disposition: Retained.

35 Ill. Adm. Code 726.360
    Past date: April 22, 2002 (second)
    Function of date/provision: A storage unit that was used to store LLMW and non-mixed
    hazardous waste before the date and which after the date stores both LLMW and mixed
    hazardous waste is subject to closure requirements regard to the non-mixed hazardous waste.
    The operative condition is storage of both LLMW and non-mixed hazardous waste. The fact
    of storage before the date or afterward does not affect the requirement. Removing the date
    will not affect the scope of the Illinois RCRA Subtitle C rule.
    Disposition: Date deleted.

35 Ill. Adm. Code 728.114(b)
    Past date: November 8, 1984
    Function of date/provision: An owner or operator of a surface impoundment that stores a
    waste newly identified or listed as hazardous waste by USEPA after the date may continue to
    store the waste in the surface impoundment for 48 months after USEPA identified or listed
    the waste as hazardous waste. Essentially, the date functions to distinguish between existing
    and new facilities. Storage of wastes identified or listed as hazardous waste before the date
    could continue. Removing the past effective date could make the Illinois RCRA Subtitle C
    rule more stringent than its federal counterpart as to wastes stored before the date. Note:
    The date was the effective date of the Hazardous and Solid Waste Amendments of 1984
    (HSWA), Pub. L. 98-616, 98 Stat. 3221 (Nov. 8, 1984), which amended section 3004 of
    RCRA (42 U.S.C. § 6924 (2016)) to institute restrictions on land disposal of hazardous
    wastes. *See* HSWA, § 201, 98 Stat. at 3226-33.
    Disposition: Retained.

35 Ill. Adm. Code 728.114(c)
    Past date: November 8, 1984
    Function of date/provision: An owner or operator of a surface impoundment that treats a
    waste newly identified or listed as hazardous waste by USEPA after the date may continue to
    treat the waste in the surface impoundment, but the owner or operator must comply with the
    surface impoundment treatment exemption within 48 months after USEPA identified or
    listed the waste as hazardous waste. See the entry for 35 Ill. Adm. Code 728.104(b) above in
    this Table 4.
    Disposition: Retained.

35 Ill. Adm. Code 728.Appendix G
    Past date: Numerous dates
    Function of date/provision: The land disposal restrictions (LDRs) for each identified or
    listed hazardous waste was the date listed for the waste. The dates are used in determining
    the regulatory status of contaminated soil based, *inter alia*, on whether the soil was
    contaminated before or after the LDR effective date. Removing the dates could make the
    Illinois RCRA Subtitle C rule more stringent than its federal counterpart as applied to soils
    contaminated before the date.
    Disposition: Retained.

35 Ill. Adm. Code 730.101(b)
>   Past date: February 1, 1984
>   Function of date/provision: Underground injection that is not authorized by rule or permit is unlawful on and after the date. Removing the date will not affect the scope of the Illinois underground injection control rules.
>   Disposition: Date deleted

35 Ill. Adm. Code 730.103, "date of approval of the Illinois UIC program"
>   Past date: February 1, 1984
>   Function of date/provision: None. The defined term does not appear elsewhere in the rules. Removing the date would require removing the definition.

>   Past date: August 25, 1988
>   Function of date/provision: An injection well that had a permit of permit by rule before the date is an existing well. The date determines whether an injection well is an existing well. Removing the date could result in the Illinois rules becoming more stringent than their federal counterparts as to existing injection wells or less stringent as to new injection wells.
>   Disposition: Retained the date.

35 Ill. Adm. Code 730.181(c)
>   Past date: December 10, 2011
>   Function of date/provision: The owner or operator of a Class I injection well previously permitted or a Class V experimental injection well that injected carbon dioxide for geologic sequestration and which no longer operates for experimental purposes must apply for a Class VI permit before the date. The date no longer has a function. Removing the date will not affect the scope of the Board's underground injection control rules.

Disposition: Retained the date.

35 Ill. Adm. Code 739.122(d)
Past date: October 4, 1996
Function of date/provision: A generator must undertake specified actions for any release of used oil that occurs after the date (the effective date of the authorized used oil program in Illinois). It is unlikely but possible that a release of used oil occurred before the date to which the generator has not yet responded in the required ways. Removing the past date could make the Illinois used oil rule more stringent than it federal counterpart.
Disposition: Retained the date.

35 Ill. Adm. Code 739.122(d) Board note
