Subject: [External] Dynegy-Vistra Proposed rule change, case number R2018-20.
Date: Thursday, January 17, 2019 4:21:35 PM

Dear IL Pollution Control Board Assistant Clerk,

This earth is NOT a gift to us from our parents to use and abuse for our own personal gains . this earth is on loan to us from our children, grandchildren and all future generations to come!!!! We MUST begin treating our environment responsibly so the future generations have a safe healthy world to enjoy and live in as generations past have always been able to do. We ALL must take and work with this reality. It SHOULD NOT be about corporate gain . it should be about the health and welfare of ALL. Keep the current MPS rate-based standards!!!!!!!!!!!!!!!!!!!!

Dear Clerk Brown:

Please accept my comment on the Dynegy-Vistra Proposed rule change, case number R2018-20.

I am writing in solidarity with communities members who are rightly concerned about their air quality worsening under the current proposal. While the PCB made changes to Dynegy-Vistra's request, those changes do not go far enough and ultimately still allow Dynegy-Vistra to increase its dangerous coal pollution by 40%. These changes to state air protections are unnecessary and the current MPS rate-based standard should be kept in place.

No Illinois community, like Peoria, should be a sacrifice zone with uncontrolled plants. Instead of weakening air regulations, Illinois should be leading in environmental health protections for our residents by strengthening existing rules like the MPS to require polluting coal plants to install modern pollution controls.

Thank you for this opportunity to comment,

Sincerely,

Deborah Cheek
