Subject: [External] Dynegy-Vistra Proposed rule change, case number R2018-20.
Date: Thursday, January 17, 2019 9:29:31 PM

Dear IL Pollution Control Board Assistant Clerk,

For the sake of all people -- including those YOU hold dear -- there should be NO INCREASE IN AIR POLLUTION, EVER. We must work toward REDUCING AIR POLLUTION EVERYWHERE. We know the dangers and the cost to human life, and there is no excuse for allowing it to continue, since we know there are alternatives. Your friends and family will thank you!

Dear Clerk Brown:

Please accept my comment on the Dynegy-Vistra Proposed rule change, case number R2018-20.

I am writing in solidarity with communities members who are rightly concerned about their air quality worsening under the current proposal. While the PCB made changes to Dynegy-Vistra's request, those changes do not go far enough and ultimately still allow Dynegy-Vistra to increase its dangerous coal pollution by 40%. These changes to state air protections are unnecessary and the current MPS rate-based standard should be kept in place.

No Illinois community, like Peoria, should be a sacrifice zone with uncontrolled plants. Instead of weakening air regulations, Illinois should be leading in environmental health protections for our residents by strengthening existing rules like the MPS to require polluting coal plants to install modern pollution controls.

Thank you for this opportunity to comment,

Sincerely,

Fran Langner
