Subject: [External] Dynegy-Vistra Proposed rule change, case number R2018-20.
Date: Thursday, January 17, 2019 11:51:32 PM

Dear IL Pollution Control Board Assistant Clerk,

At the One Earth Film Festival I saw people in Beijing wearing masks and keeping their windows closed because of the pollution from coal based power plants.

Please do not committ communities in Illinois to such energy production. Keep fossil fuels in the ground unless you would like to see your home float away in a storm of the century, that occurs with regularity these days. Let us instead commit to 100% renewable energy within the next decade.

Dear Clerk Brown:

Please accept my comment on the Dynegy-Vistra Proposed rule change, case number R2018-20.

I am writing in solidarity with communities members who are rightly concerned about their air quality worsening under the current proposal. While the PCB made changes to Dynegy-Vistra's request, those changes do not go far enough and ultimately still allow Dynegy-Vistra to increase its dangerous coal pollution by 40%. These changes to state air protections are unnecessary and the current MPS rate-based standard should be kept in place.

No Illinois community, like Peoria, should be a sacrifice zone with uncontrolled plants. Instead of weakening air regulations, Illinois should be leading in environmental health protections for our residents by strengthening existing rules like the MPS to require polluting coal plants to install modern pollution controls.

Thank you for this opportunity to comment,

Sincerely,

Janice Gintzler
