Subject: [External] Dynege-Vistra Proposed rule change, case number R2018-20.
Date: Saturday, January 19, 2019 1:49:16 PM

Dear IL Pollution Control Board Assistant Clerk,

It is imperative that we do not allow this increase in air pollution by Dynege-Vistra to endanger the health of Illinois citizens. There is a solution to this but they just don't want to pay for it. But we pay with our health. Shame on them.

Dear Clerk Brown:

Please accept my comment on the Dynege-Vistra Proposed rule change, case number R2018-20.

I am writing in solidarity with communities members who are rightly concerned about their air quality worsening under the current proposal. While the PCB made changes to Dynege-Vistra's request, those changes do not go far enough and ultimately still allow Dynege-Vistra to increase its dangerous coal pollution by 40%. These changes to state air protections are unnecessary and the current MPS rate-based standard should be kept in place.

No Illinois community, like Peoria, should be a sacrifice zone with uncontrolled plants. Instead of weakening air regulations, Illinois should be leading in environmental health protections for our residents by strengthening existing rules like the MPS to require polluting coal plants to install modern pollution controls.

Thank you for this opportunity to comment,

Sincerely,

Kathleen Gysler
