**To:** [Brown, Don](#)  
**Subject:** [External] Dynegy-Vistra Proposed rule change, case number R2018-20.  
**Date:** Monday, January 21, 2019 8:00:57 AM

---

Dear IL Pollution Control Board Assistant Clerk,

Illinois is in desperate need of money but as far as I can see you're paying executives 300000 + dollars for supervisory positions adding to billions of dollars and now you want to pay for it with our clean air.

No.

That would be a no.

8 men have more wealth than the world's poorest 3.5 billion. We have to stop putting corporate profits ahead of the good of the only planet that we have to live on, and started governing in the interest of the people that live on this planet and not the handful of rich people..

Dear Clerk Brown:

Please accept my comment on the Dynegy-Vistra Proposed rule change, case number R2018-20.

I am writing in solidarity with communities members who are rightly concerned about their air quality worsening under the current proposal. While the PCB made changes to Dynegy-Vistra's request, those changes do not go far enough and ultimately still allow Dynegy-Vistra to increase its dangerous coal pollution by 40%. These changes to state air protections are unnecessary and the current MPS rate-based standard should be kept in place.

No Illinois community, like Peoria, should be a sacrifice zone with uncontrolled plants. Instead of weakening air regulations, Illinois should be leading in environmental health protections for our residents by strengthening existing rules like the MPS to require polluting coal plants to install modern pollution controls.

Thank you for this opportunity to comment,

Sincerely,

Kathleen Alnory
