

Electronic Filing: Received, Clerk's Office 1/30/2019 P.C. #3285

From: [Richard Stuckey \(rjstuckey@aol.com\)](mailto:rjstuckey@aol.com) Sent You a Personal Message
To: [Brown, Don](#)
Subject: [External] Dynege-Vistra Proposed rule change, case number R2018-20.
Date: Wednesday, January 30, 2019 2:23:12 PM

Dear IL Pollution Control Board Assistant Clerk,

the latest proposed rule allows Dynege-Vistra to increase its pollution in Illinois by 40%. That is totally unacceptable. Illinois has one of the best locations for wind power which is cheaper than Dynege-Vistra's dirty power from coal. No more gifts to Dynege.

Dear Clerk Brown:

Please accept my comment on the Dynege-Vistra Proposed rule change, case number R2018-20.

I am writing in solidarity with communities members who are rightly concerned about their air quality worsening under the current proposal. While the PCB made changes to Dynege-Vistra's request, those changes do not go far enough and ultimately still allow Dynege-Vistra to increase its dangerous coal pollution by 40%. These changes to state air protections are unnecessary and the current MPS rate-based standard should be kept in place.

No Illinois community, like Peoria, should be a sacrifice zone with uncontrolled plants. Instead of weakening air regulations, Illinois should be leading in environmental health protections for our residents by strengthening existing rules like the MPS to require polluting coal plants to install modern pollution controls.

Thank you for this opportunity to comment,

Sincerely,

Richard Stuckey
