Date: Thursday, January 31, 2019 2:42:16 PM

Hello,

I am an Illinois citizen who is concerned about the pollution contributed by coal plants. Dynege's Wood River Power Station is located in my hometown, and has caused detrimental contamination to our groundwater. I am worried about my family and I's health outcomes following the toxicity Dynege has left behind. It is important that we continue to keep the MPS rate-based standard, and not allow our pollution to almost double. Illinois, under new administration, should be leading us to cleaner, eco-friendly jobs for the years to come, and cutting back immensely on fossil fuels.

Thank you for accepting my public commentary,

--
