Subject: [External] Dynegy-Vistra Proposed rule change, case number R2018-20.
Date: Thursday, February 14, 2019 11:38:53 AM

Dear IL Pollution Control Board Assistant Clerk,

This is "The Land of Lincoln"- "Honest Abe", Please help Illinois be as good as Iowa and Wisconsin. I am proud to be a midwesterner and Pollution Is Unacceptable. Iowa is both Financially responsible and a leader in Wind Energy. Wisconsin is rich in culture. Illinois is known for Chicago and thus far Chicago is mostly known for crime and political corruption. I have great hope for my Home State- Lets catch up and be a good neighboring state- furthermore I live close to these two states, why isn't their more collaboration with them? If you want to do right by me and pretty much everyone my age or younger, you will reduce pollution as much as possible and continue to restrict pollution every year until there is close to zero waste and zero pollution. I am proud that Illinois is committing to transition into cleaner energy- done be hypocritical. Best regards....

Dear Clerk Brown:

Please accept my comment on the Dynegy-Vistra Proposed rule change, case number R2018-20.

I am writing in solidarity with communities members who are rightly concerned about their air quality worsening under the current proposal. While the PCB made changes to Dynegy-Vistra's request, those changes do not go far enough and ultimately still allow Dynegy-Vistra to increase its dangerous coal pollution by 40%. These changes to state air protections are unnecessary and the current MPS rate-based standard should be kept in place.

No Illinois community, like Peoria, should be a sacrifice zone with uncontrolled plants. Instead of weakening air regulations, Illinois should be leading in environmental health protections for our residents by strengthening existing rules like the MPS to require polluting coal plants to install modern pollution controls.

Thank you for this opportunity to comment,

Sincerely,

Jeffrey Patterson
