Re: In the Matter of: Natural Gas-Fired, Peak-Load
Electrical Power Generating Facilities (Peaker Plants)
No. R01-10

Dear Ms. Jackson:

As requested of me during the public hearing in this matter held in Grayslake on September 21, 2000, I enclose copies of the following noise studies that are in my possession which were conducted in connection with Libertyville and Bartlett proposed peaker plant sitings:

Noise Impact Study Regarding Proposed Indeck-Libertyville 300 MW Turbine Generation Installation and Appendix A to Noise Impact Study Octave Band Analyses and A-Weighted Continuous Monitoring Data prepared by Midwest Environmental Assistance Center

Noise Study of Planned Peaking Power Project prepared by Acentech Incorporation in connection with the Libertyville matter

Each of the above two studies was introduced into evidence in the hearing that was held before the Libertyville Plan Commission.

Noise Impact Analysis Performed by Mostardi Platt for ABB Energy Ventures, Inc. for the Proposed Grande Prairie Power Project in Bartlett

The Noise Impacts portion of the Environmental Consultants Findings and Recommendations Report, for the Proposed Grande Prairie Power Plant prepared for the Village of Bartlett by Deigan & Associates

BLATT HAMMESEFAHR & EATON

Ms. Amy L. Jackson
Hearing Officer
Illinois Pollution Control Board
Page 2

I believe, but am not positive, that both of the two above studies, including the entire Deigan report, were introduced in hearings before the Bartlett Village Council Committee of the Whole.

I hope this may be of assistance to you and the Board in your continuing efforts.

Very truly yours,
