

Dear Illinois Pollution Control Board,
This is to ask you to adopt
the strong pollution controls that
would cut coal plant mercury
pollution by 90% by 2009. As
a parent in Illinois, I am alarmed
by the threat mercury poses to
my children's health. This proposal
can help make a cleaner, safer
environment for all
at a reasonable cost.

Sincerely,
PCA 324

Susan

Dear _____

Nationally, forty-five states have health warnings for eating locally-caught fish due to mercury. In many states, these warnings include all fish and all waters. We call on you to address, by all means possible, the substantial mercury pollution problem we face today.

- One-in-six women of child-bearing age – over 630,000 – have blood mercury levels that can poison a developing child.
- Nationally, estimates on the economic impacts to taxpayers for the effects of mercury poisoning range as high as \$43.8 billion dollars per year.
- Technology exists that would protect the health and safety of our communities by reducing mercury pollution in coal-fired power plants by 90% or more, and alternatives exist for most mercury-containing products or purposeful uses.
- We need swift, comprehensive action to effectively deal with mercury pollution. We call upon you to immediately address this problem at all levels.

Sincerely yours,

Name: Nicky Drennan
Address: 1405 E. Converse

Dear Members Of The Illinois Pollution Control Board:

RECEIVED

CLERK'S OFFICE

I urge you to adopt strong controls that, by 2009, would cut coal plant mercury pollution by 90%.

MAY 15 2006

Every river, lake, and stream in Illinois now carries a health warning for mercury contamination. Illinois can address this problem now and show America how requiring cost-effective measures for mercury control will clean up local lakes and streams and promote a healthy economy.

Reducing mercury emissions by 90% is achievable at reasonable cost. Please approve this plan to protect our families and our wildlife from unnecessary harm.

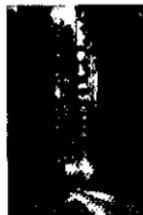

Sincerely,

Laurel Toussant
