Dear Ms. Gunn:

I understand that there was testimony given at the September 21st hearing concerning Peaker Plants indicating that the City of Zion was considering the approval of three peaker plant projects. I respectfully request that it be noted in the record that the City of Zion is only considering one peaker power plant project. The Mayor has made several public announcements that the Skygen peaker plant project is the only project being considered by the City. An air quality permit application has been filed with IEPA by Carlton Power however that site is not in the City of Zion and is not zoned for a peaker plant. Again Mayor Harrison has announced publicly that that project is not being considered by the City.

Sincerely,

Peter J. Cioni  
Dir. of Community Development
