

Dear members of the Illinois PCB,

MAY 10 2006

STATE OF ILLINOIS
Pollution Control Board

Please enable Illinois to cut coal plant mercury pollution by 90% by implementing the strong controls Gov. Blagojevich's offered plan.

As a minister to children in Illinois, I find it alarming how the levels of mercury in our state's water and air threaten their health. Our children must have a clean environment in PC #289 which to grow and thrive — this proposal can help make that possible at reasonable cost. Sincerely, The Rev. Mrs. Barbara Pessier
