**Narrative Inspection Report**

I conducted a routine open dump inspection of the above referenced facility on June 7, 2006. This inspection was conducted to determine the regulatory status and evaluate compliance with the Environmental Protection Act (Act) and Title 35 Illinois Administrative Code, Subtitle G: Land Pollution (Regulations). The weather was partly cloudy, calm, and dry, with temperatures in the 80s. Fifteen photos were taken during the visit. No one was present.

**Background and History**

Champaign FOS was asked to inspect this site by the Macon County Solid Waste Department (MCSWD). The last delegated inspector resigned, leaving no one to handle this site. The property is agricultural land just south of Illinois 121 and is accessed just west of an implement dealer. The site was first inspected on February 1, 1991 by Illinois EPA. Open dumping violations were found. A reinspection on 11/28/94 found additional open dumping violations related to general C & D debris cited. An ACWN was issued on 12/16/94. The property was reinspected on 3/16/95 and had returned to compliance. On 8/18/2000, the MCSWD inspected the site and found Tree Works, Inc. had been dumping landscape waste from off-site at the property. A 7/05/01 Inspection found general construction and demolition debris dumped again at the site. A 7/11/2001 inspection found the C&D Debris had been removed, but off-site landscape waste had again been dumped at the site. A 2/15/2006 inspection by MCSWD found additional general C&D Debris had been dumped at the site. MCSWD did not follow-up on the inspection because their inspector resigned.

The owner of the property is Frank Wilhelm, 2245 East William Street in Decatur, Illinois. Ownership documents are in the MCSWD report on 11/28/1994 and, according to Sherri Ludlam from MCSWD, have not changed.

**Site Inspection**

I arrived at the site at approximately 12:35 P.M. The access road near Richland sales had a gate across it, but a well worn track was observed going around the gate. I took this track and drove around the edge of a farm field to the dump area located on both sides of

a small creek. At the dump site, I found a large amount of landscape waste with railroad ties, plastic pipe, a broken plastic garbage can, pallets, and other debris mixed in (see photos 5-6). Part of the area east of the creek had been filled with broken concrete with exposed rebar and general construction debris could be seen partially buried (photos 9-10). The creek has been impacted by dumped concrete and broken asphalt (see photos 12, 13, 14). Five empty drums were floating or lodged near the culvert across the stream (see photo 7). Only the narrowness of the culvert kept the drums from floating downstream.

On the west side of the creek, I found several large piles of painted broken concrete block. Since the block was painted, it did not qualify as uncontaminated and therefore was not clean construction and demolition debris (see photos 1-2). Both side of the creek had piles of concrete with protruding rebar and landscape waste with railroad ties and telephone poles mixed in.

The only areas that contained material that would be considered clean construction and demolition debris were 30-40 loads of soil and rock that were dumped north of the main dump site. None of these loads contained any material that would render them general C&D debris.

In addition, along the access road at the southernmost extent of the farm field, I observed a large area where shredded landscape waste had been dumped down a hillside. The waste was at least eight feet deep along the face of the dump. The waste did not look weathered enough to have been dumped too long ago (see photo 15). I did not see any recent areas on site that had been cleared to generate as much material as was present, which leads me to believe the material could have only come from off-site.

#### **Regulated Status**

This site is regulated as an open dump. It has received landscape waste from off site. In addition, general construction and demolition debris, drums, railroad ties, telephone poles, and other debris were all observed dumped and/or partially buried.

#### **Apparent violations observed during this inspection:**
