b) Part (Heading and Code Citation):

Definitions and General Provisions (35 Ill. Adm. Code 211)

1) Rulemaking: Docket number R07-10

A) Description:

Section 9.1(e) of the Environmental Protection Act [415 ILCS 5/9.1(e)] mandates that the Board update the Illinois definition of volatile organic material (VOM) to reflect the additions made by the United States Environmental Protection Agency (USEPA) to the list of compounds exempt from regulation as ozone precursors. Those compounds are determined by USEPA to be exempt from regulation under the state implementation plan (SIP) for ozone in the federal "Recommended Policy on the Control of Volatile Organic Compounds" (Recommended Policy) due to their negligible photochemical reactivity. On February 3, 1992 (57 Fed. Reg. 3945), USEPA codified its definition of VOM at 40 CFR 51.100(s), which now embodies the former Recommended Policy. This codified definition now includes all the compounds and classes of compounds previously exempted in the former Recommended Policy. The Illinois definition of VOM is presently codified at 35 Ill. Adm. Code 211.7150.

The Board has reserved docket number R07-10 to accommodate any federal amendments to the 40 CFR 51.100(s) definition of VOM that USEPA may make in the period July 1, 2006 through December 31, 2006. At this time, the Board is not aware of any federal amendments to the federal definition of VOM that occurred during this update period.

The Board will verify the existence of any federal actions and the Board action required in response to each in coming weeks, by about mid-

ILLINOIS REGISTER

POLLUTION CONTROL BOARD

JANUARY 2007 REGULATORY AGENDA

February 2006. The Board will then propose corresponding amendments to the Illinois definition of VOM using the identical-in-substance procedure or dismiss docket R07-10, as necessary and appropriate.

Section 9.1(e) mandates that the Board complete amendments within one year of the date on which USEPA adopted the earliest action upon which the amendments are based. In docket R07-10, if the earliest federal amendments in the applicable period were assumed to have occurred on the first day of the update period, on July 1, 2006, the due date for Board adoption would be July 1, 2007.

B) Statutory authority:

Implementing and authorized by Sections 7.2, 9.1(e), and 27 of the Environmental Protection Act [415 ILCS 5/7.2, 9.1(e) & 27].

C) Scheduled meeting/hearing dates:

None scheduled at this time. The Board will vote to propose any amendments at an open meeting in accordance with requirements established by Sections 27 and 28 of the Act [415 ILCS 5/27 & 28]. The Board will then schedule and conduct at least one public hearing, as required by Section 118 of the federal Clean Air Act (42 USC § 7418) for amendment of the Illinois ozone SIP.

D) Date agency anticipates First Notice:

The Board cannot project an exact date for publication at this time. The Board expects to verify any federal actions by mid-February 2006, after which time the Board will propose any amendments to the Illinois definition of VOM that are necessary in response to the federal amendments that have occurred. If the due date for Board adoption of amendments in this docket were assumed to be July 1, 2007, for the purposes of illustration, the Board would vote to propose amendments and cause a Notice of Proposed Amendments to appear in the *Illinois Register* by early April 2007. This would be sufficiently in advance of the due date to allow the Board to accept public comments on the proposal for 45 days before acting to adopt any amendments. Alternatively, if no amendment

POLLUTION CONTROL BOARD

to the Illinois definition is needed, the Board will promptly dismiss this reserved docket.

E) Effect on small business, small municipalities, or not-for-profit corporations:

This rulemaking may affect any small business, small municipality, or not-for-profit corporation that engages in the emission of a chemical compound that is the subject of a proposed exemption or proposed deletion from the USEPA list of exempted compounds.

G) Related rulemakings and other pertinent information:

No other presently known proceeding would affect provisions of Part 211.

Section 9.1(e) of the Environmental Protection Act [415 ILCS 5/9.1(e)] provides that Title VII of the Act and Section 5 of the Administrative Procedure Act (APA) [5 ILCS 100/5-35, 40] shall not apply. Because this rulemaking is not subject to Section 5 of the APA, it is not subject to First

DEFINITIONS AND GENERAL PROVISIONS (35 Ill. Adm. Code 211)
NITROGEN OXIDES EMISSIONS (35 Ill. Adm. Code 217, Subparts A and Q)

1) Rulemaking: No docket presently reserved.

A) Description:

The Illinois Environmental Protection Agency (Agency) is currently developing amendments for proposal to the Board to address Phase II of the United States Environmental Protection Agency's (USEPA's) nitrogen oxides (NO_x) State Implementation Plan (SIP) call. The (NO_x) SIP call required affected states, including Illinois, to regulate the NO_x emissions from large stationary internal combustion engines as required by the federal Clean Air Act (CAA). (69 *Fed. Reg.* 21604 (April 21, 2004)). This statewide proposal will also regulate NO_x emissions from smaller engines and turbines, as part of the State's obligation to meet NO_x reasonably available control technology requirements (RACT) for the new 8-hour ozone and PM_{2.5} National Ambient Air Quality Standard (NAAQS), reasonable further progress (RFP), and attainment demonstration requirements. In addition, the proposal will include conforming amendments for Part 201, concerning affected units that would be required to obtain operating permits and for Part 211, concerning applicable definitions.

B) Statutory authority:

Implementing and authorized by Sections 9.9, 10, 27 and 28.5 of the Illinois Environmental Protection Act [415 ILCS 5/9.9, 10, 27 and 28.5].

Illinois has two 8-hour ozone and PM_{2.5} nonattainment areas, greater Chicago and Metro-East/St. Louis. NO_x is one of the precursors to the formation of both ozone and PM_{2.5}. Control of NO_x emissions from the following types of units may be included in the proposal: ICI boilers less than 250 mmBtu, electric generating less than 25 megawatts, cement kilns, lime kilns, glass melting furnaces, iron and steel plants, and aluminum melting furnaces. Nitrogen Oxides Emissions (35 Ill. Adm. Code 217)

1) Rulemaking: R06-22

ILLINOIS REGISTER

POLLUTION CONTROL BOARD

JANUARY 2007 REGULATORY AGENDA

A) Description:

On January 19, 2006, the Board received a rulemaking proposal submitted by the Illinois Environmental Protection Agency (Agency) pursuant to Section 27 and 28 of the Illinois Environmental Protection Act (Act) (415 ILCS 5/27 and 28 (2004)). Included in this proposal are amendments to the regulations governing Nitrogen Oxide (NO_x) emissions found at 35 Ill. Adm. Code Part 217, Subparts A, T, U, and W.

The amendments propose to update Part 217 to reflect recent amendments made by the United States Environmental Protection Agency (USEPA) to the Code of Federal Regulations concerning several test methods and procedures, and by the Illinois General Assembly to Section 9.9 of the Act concerning the sale of NO_x allowances and the repeal of the stay provisions. The Agency proposes amendments intended to ensure that the NO_x budgets for both the Electrical Generating Units (EGU) and the non-EGUs are not reduced by low-emitters in a way that was not anticipated at the time the rules were originally adopted by the Board. Finally, the Agency proposes clarifications to the dates and timing of allocations designed to simplify the administration of the NO_x Trading Program. The Agency asserts that this proposal does not change the emission limits or require new control devices on affected sources.

B) Statutory authority:

Implementing Sections 9.9 and 10 and authorized by Sections 27 and 28.5 of the Environmental Protection Act [415 ILCS 5/9.9, 10, 27 and 28.5].

CONTROL OF EMISSIONS FROM LARGE COMBUSTION SOURCES (35 Ill. Adm. Code 225)

ILLINOIS REGISTER

POLLUTION CONTROL BOARD

JANUARY 2007 REGULATORY AGENDA

1) Rulemaking: R06-26

A) Description:

This rulemaking was proposed to the Board by the Illinois Environmental Protection Agency (Agency) on May 30, 2006. The Agency proposes amendments to Part 225 to reduce intrastate and interstate transport of sulfur dioxide (SO₂) and nitrogen oxides (NO_x) emissions from fossil fuel-fired electric generating units (affected units), on an annual basis and on an ozone season basis of each calendar year. The Agency proposes the adoption of the Clean Air Interstate Rule (CAIR) SO₂ trading program, the CAIR NO_x Annual trading program and the CAIR NO_x Ozone Season trading program to accomplish this objective.

The proposed rule contains five subparts. As proposed, Subpart A includes general provisions, Subpart B is reserved—although this Subpart is included in the R06-25 rulemaking, Subpart C contains the CAIR SO₂ trading program, Subpart D details the CAIR NO_x Annual trading program, and Subpart E addresses the CAIR NO_x Ozone Season trading program.

The Agency asserts that its proposal is intended to satisfy Illinois' obligations under the United States Environmental Protection Agency's (USEPA) Rule to Reduce Interstate Transport of Fine Particulate Matter and Ozone; Revisions to Acid Rain Program; Revisions to the NO_x SIP Call, (CAIR), 70 *Fed. Reg.* 25162 (May 12, 2005). The proposal is also intended to the Agency's obligation to meet Clean Air Act (CAA) requirements for the control of fine particulate matter (PM_{2.5}) and ozone in the Chicago and Metro East/St. Louis nonattainment areas.

B) Statutory authority:

Implementing and authorized by Sections 27 and 28 of the Environmental Protection Act [415 ILCS 5/27 & 28].

C) Scheduled meeting/hearing dates:

WATER QUALITY STANDARDS (35 Ill. Adm. Code 302)

1) Rulemaking: R04-25

A) Description:

This rulemaking was proposed to the Board on April 19, 2004 by the Illinois Association of Wastewater Agencies (IAWA). IAWA seeks to amend the Board's rule establishing general use water quality standards for dissolved oxygen (35 Ill. Adm. Code 302.206). Under the existing Board water quality standard, dissolved oxygen must not be less than 6.0 milligrams per liter (mg/L) during at least 16 hours of any 24 hour period, nor less than 5.0 mg/L at any time. IAWA seeks to amend these standards by explicitly providing that dissolved oxygen be determined on a monthly basis and specifying that (a) during the months of July through February, dissolved oxygen must not be less than a one-day minimum concentration of 3.5 mg/L, and a seven-day mean minimum of 4.0 mg/L, and (b) during the months of March through June, dissolved oxygen must not be less than a one-day minimum concentration of 5.0 mg/L, and a seven-day mean of 6.0 mg/L. IAWA also proposed definitions of "mean minimum" and "mean."

B) Statutory authority:

1) Rulemaking: Docket number R07-16

A) Description:

Section 13.3 of the Environmental Protection Act [415 ILCS 5/13.3] mandates that the Board update the Illinois wastewater pretreatment regulations to reflect revisions made to the federal wastewater pretreatment rules made by the United States Environmental Protection Agency (USEPA).

The Board has reserved docket number R07-16 to accommodate any amendments to the federal wastewater pretreatment rules, 40 CFR 400 through 499, that the USEPA may have made in the period July 1, 2006 through December 31, 2006. At this time, the Board is not aware of any federal amendments to the federal wastewater pretreatment regulations that occurred during this update period.

The Board will verify the existence of any federal actions that may affect the text of the federal wastewater pretreatment regulations and the Board action required in response to each set of federal amendments in coming weeks, by about mid-February 2006. The Board will then propose corresponding amendments to the Illinois wastewater pretreatment regulations using the identical-in-substance procedure under docket R07-16, as necessary and appropriate.

Section 13.3 of the Act mandates that the Board complete amendments within one year of the date on which USEPA adopted the earliest action upon which the amendments are based. In docket R07-16, if the earliest federal amendments in the applicable period were assumed to have occurred on the first day of the update period, on July 1, 2006, the due date for Board adoption would be July 1, 2007.

B) Statutory authority:

D) Date agency anticipates First Notice:

The Board cannot project an exact date for publication at this time. The Board expects to verify any federal actions by mid-February 2006, after which time the Board will propose any amendments to the Illinois wastewater treatment rules that are necessary in response to the federal amendments that have occurred. If the due date for Board adoption of amendments in this docket were assumed to be July 1, 2007, the Board will vote to propose amendments and cause a Notice of Proposed Amendments to appear in the *Illinois Register* by early April 2007. This would be sufficiently in advance of the due date to allow the Board to accept public comments on the proposal for 45 days before acting to adopt any amendments. Alternatively, if no amendment to the Illinois wastewater pretreatment rules is needed, the Board will promptly dismiss this reserved docket.

E) Effect on small business, small municipalities, or not-for-profit corporations:

Primary Drinking Water Standards (35 Ill. Adm. Code 611)

1) Rulemaking: Docket number R07-11

A) Description:

Section 17.5 of the Environmental Protection Act [415 ILCS 5/17.5] mandates that the Board update the Illinois SDWA regulations to reflect the USEPA amendments to the federal Safe Drinking Water Act (SDWA) primary drinking water regulations.

The Board has reserved docket number R07-11 to accommodate any amendments to the SDWA national primary drinking water standards, 40 CFR 141 through 143, that the United States Environmental Protection Agency (USEPA) may make in the period July 1, 2006 through December 31, 2006. At this time, the Board is aware of one set of federal amendments to the federal national primary drinking water regulations and one set of corrections that occurred during this update period. The amendments and corrections are described as follows:

71 Fed. Reg. 65574 (November 8, 2006)

USEPA adopted a new Ground Water Rule (GWR). The federal GWR amendments to the National Primary Drinking Water Regulations is effective January 8, 2007. The GWR is intended to increase protection against microbial pathogens in public water systems that use ground water sources. The GWR requires disinfection as a treatment technique for all public water systems, including surface water systems and ground water systems, as necessary. The GWR targets ground water systems that are susceptible to fecal contamination, instead of requiring disinfection for all ground water systems. The GWR requires ground water systems that are at risk of fecal contamination to take corrective action to reduce cases of illnesses and deaths due to exposure to microbial pathogens.

71 Fed. Reg. 67427 (November 21, 2006)

USEPA corrected the references to analytical methods for use under the GWR.

The Board will verify the existence of any additional federal actions that may affect the text of the federal primary drinking water standards and the Board action required in response to each in coming weeks, by about mid-February 2006. The Board will then propose corresponding amendments to the Illinois SDWA primary drinking water regulations using the identical-in-substance procedure or dismiss docket R07-11, as necessary and appropriate.

Section 17.5 mandates that the Board complete amendments within one year of the date on which USEPA adopted the earliest action upon which the amendments are based. In docket R07-11, if the earliest federal amendments in the applicable period were assumed to have occurred on November 8, 2006, the due date for Board adoption would be November 8, 2007.

This would be sufficiently in advance of the due date to allow the Board to accept public comments on the proposal for 45 days before acting to adopt any amendments. Alternatively, if no amendment to the Illinois definition is needed, the Board will promptly dismiss this reserved docket.

E) Effect on small business, small municipalities, or not-for-profit corporations:

This rulemaking may affect any small business, small municipality, or not-for-profit corporation in Illinois that owns or operates a “public water supply,” as defined by Section 3.28 of the Act, *i.e.*, it has at least fifteen service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year, or it is assisting a public water supply to demonstrate compliance.

LABORATORY ACCREDITATION RULES (35 Ill. Adm. Code 611)

1) Rulemaking: No docket presently reserved.

A) Description:

The Illinois Environmental Protection Agency (Agency) is currently developing a proposal for filing with the Board. The proposal will seek to amend the public water supplies rules found in 35 Ill. Adm. Code 611 to cross reference the Agency's own laboratory accreditation rules found at 35 Ill. Adm. Code 186. These prospective amendments to Sections 611.359, 611.611, 611.646, and 611.648 would cross-reference the laboratory accreditation rules at 35 Ill. Adm. Code 186. Currently, the existing text of Part 611 references 35 Ill. Adm. Code 183, which are joint rules of the Agency, the Illinois Department of Public Health, and the Illinois Department of Nuclear Safety. A repeal of Part 183 has been completed.

C) Scheduled meeting/hearing dates:

No meetings or hearings are scheduled at this time. Once the proposal is filed, the Board will conduct hearings as required by Sections 27 and 28 of the Act [415 ILCS 5/27 & 28].

D) Date Agency Anticipates First Notice:

An Agency submittal of the rulemaking proposal is anticipated by Spring or Summer 2007. The Board will conduct proceedings pursuant to Sections 27 and 28 of the Environmental Protection Act [415 ILCS 5/27 & 28] upon receipt of the proposal and would cause a Notice of Proposed Amendments to appear in the *Illinois Register* when it decides to propose amendments for First Notice.

E) Affect on small business, small municipalities or not-for-profit corporations:

These amendments may affect small business, small municipalities, and not-for-profit corporations that own or operate a "public water supply", as defined by Section 3.28 of the Act, i.e., it has at least fifteen service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year, or it is assisting a public water supply to demonstrate compliance with the federally-derived National Primary Drinking Water Standards of 35 Ill. Adm. Code 611. However, it is anticipated that the proceeding will not likely have a quantifiable affect on these entities because the program for national laboratory certification is voluntary. The burden of compliance with the requirements, such as filing documentation, reporting or completion of the necessary forms, likely will not increase.

GROUNDWATER QUALITY (35 Ill. Adm. Code 620)

1) Rulemaking: No docket presently reserved.

A) Description:

The Illinois Environmental Protection Agency (Agency) continues to evaluate contaminants of concern that have been commonly detected in Illinois' groundwater for inclusion in 35 Ill. Adm. Code 620. One such constituent is perchlorate. This rocket fuel component has been discovered in Illinois' groundwater, and its occurrence in Illinois is being further evaluated. Another constituent that may be considered for inclusion in the rules is ammonia. While ammonia is not a health concern

at the concentrations at which it has been reported, the greater health risk is the conversion of ammonia to nitrite and nitrate within a water distribution system. In addition, the Agency has evaluated contaminants commonly detected in groundwater in association with solid waste and Resource Conservation and Recovery Act (RCRA) sites. Groundwater standards are being developed for approximately 48 contaminants that have been commonly detected in groundwater at these sites where cleanup objectives have already been developed under the Tiered Approach to Corrective Action Objectives (TACO)(35 Ill. Adm. Code 742). Finally, three constituents (radium 226, radium 228, and arsenic) have had new Maximum Contaminant Levels (MCLs) adopted. Radium and arsenic occur with some frequency in Illinois' groundwater. Therefore, a groundwater standard amendment consistent with the MCL will be proposed.

D) Date agency anticipates First Notice:

The Agency anticipates submitting a proposal to the Board in the Spring or Summer 2007. After the filing of a proposal by the Illinois EPA, the Board will cause publication of a Notice of Proposed Amendments in the Illinois Register.

E) Effect on small businesses, small municipalities or not-for-profit corporations:

The Agency does not anticipate that this rule will have a significant impact on any small business, small municipality, or not-for-profit corporations.

1) Rulemaking: Presently reserved docket number R07-12

A) Description:

Section 13(c) of the Environmental Protection Act [415 ILCS 5/13(c)] mandates that the Board update the Illinois underground injection control (UIC) regulations to reflect amendments to the United States Environmental Protection Agency (USEPA) UIC regulations.

The Board has reserved docket number R07-12 to accommodate any amendments to the federal UIC regulations, 40 CFR 144 through 148, during the period July 1, 2006 through December 31, 2006. At this time, the Board is not aware of any federal amendments to the federal UIC rules that occurred during this update period.

The Board will verify the existence of any federal actions that affect the UIC regulations and the Board action required in response to each in coming weeks, by about mid-February 2006. The Board will then propose corresponding amendments to the Illinois UIC regulations using the identical-in-substance procedure or dismiss docket R07-12, as necessary and appropriate.

Section 13(c) mandates that the Board complete amendments within one year of the date on which USEPA adopted the earliest action upon which the amendments are based. In docket R07-12, if the earliest federal amendments in the applicable period were assumed to have occurred on the first day of the update period, on July 1, 2006, the due date for Board adoption would be July 1, 2007.

Alternatively, if no amendment to the Illinois definition is needed, the Board will promptly dismiss this reserved docket.

A) Description:

Section 22.4(a) of the Environmental Protection Act [415 ILCS 5/22.4(a)] mandates that the Board update the Illinois rules implementing Subtitle C of the federal Resource Conservation and Recovery Act (RCRA) to reflect the United States Environmental Protection Agency (USEPA) amendments to the federal RCRA Subtitle C regulations.

The Board has reserved docket number R07-14 to accommodate any amendments to the federal RCRA Subtitle C program, 40 CFR 260 through 270, 273, and 279, that USEPA made in the period July 1, 2006 through December 31, 2006. At this time, the Board is aware of two sets of federal amendments to the federal RCRA Subtitle C hazardous waste regulations that occurred during this update period. Those sets of amendments are described as follows:

71 Fed. Reg. 40254 (July 14, 2006)

USEPA adopted a number of corrections to various of the hazardous waste and used oil management regulations.

71 Fed. Reg. 42928 (July 28, 2006)

USEPA amended the definition of hazardous waste to exclude cathode ray tubes (CRTs) that are managed within specified conditions. USEPA intends to encourage the reuse and recycling of used CRTs and glass from CRTs.

The Board will verify the existence of any federal actions and the Board action required in response to each in coming weeks, by about mid-February 2006. The Board will then propose corresponding amendments to the Illinois RCRA Subtitle C hazardous waste regulations using the identical-in-substance procedure or dismiss docket R07-14, as necessary and appropriate.

Section 22.4(a) mandates that the Board complete amendments within one year of the date on which USEPA adopted the earliest action upon which the amendments are based. Assuming for the purposes of illustration that the earliest USEPA action during the update period that will require Board

1) Rulemaking: R07-8

A) Description:

The Board accepted for hearing on August 17, 2006, a proposal filed by the Illinois Chapter of the National Solid Wastes Management Association (NSWMA) to amend the Board's solid waste disposal regulations. When filing this rulemaking proposal the NSWMA stated that it is "a not-for-profit trade association representing companies that provide solid, hazardous, and medical waste collecting, recycling, and disposal services." According to NSWMA, the proposal seeks to update the Board's regulations to reflect current solid waste disposal practices, and noted that many of the rules proposed for amendment have been in effect since 1990.

NSWMA stated that its proposal reflects both practical experience with implementing these regulations and increased technical and scientific knowledge. NSWMA described its proposal as “the culmination of almost seven years of discussions” with the Illinois Environmental Protection Agency (Agency). NSWMA stated that the Agency “supports and concurs with all of the proposed amendments.”

NSWMA stated that it expects the following benefits to result from adoption of its proposal. First, “it will eliminate or modify certain regulations that are no longer technically reasonable in that they do not reflect current and accepted practice in the industry.” Second, NSWMA believes that the proposal will generate more accurate data, leading to improved regulatory decision-making and environmental protection. Third, NSWMA believes that the proposal will improve efficiency both for the Agency and for regulated solid waste facilities.

PROCEDURAL REQUIREMENTS FOR MUNICIPAL WASTE TRANSFER STATION PERMITS (New Part)

1) Rulemaking: No docket presently reserved.

A) Description:

The Illinois Environmental Protection Agency (Agency) is working on a proposal to add new rules to the Board's waste regulations. Municipal waste transfer stations currently are regulated under 35 Ill. Adm. Code 807. The Part 807 rules were developed primarily for solid waste

landfills. As applied to transfer stations, they are very general with many of the specific requirements for transfer stations imposed through permit conditions under Section 807.206. Transfer stations are increasing in number and importance in Illinois' waste management system. In addition, the United States Environmental Protection Agency published in June 2002 "Waste Transfer Stations: A Manual for Decision-Making" (EPA530-R-02-002), guidance developed to "promote the use of best practices in transfer station siting, design and operation to maximize facilities' effectiveness while minimizing their impact on the community." The Agency is developing new Parts that will provide more specific requirements for the design, construction, operation and closure of municipal waste transfer stations as well as procedures for obtaining permits. Included with municipal waste transfer stations accepting garbage and general household and commercial waste are those transfer stations accepting exclusively construction and demolition debris and those used exclusively for landscape waste.

B) Statutory authority:

These rules will be proposed pursuant to Sections 4(i), 21(d), 22, 27 and 28 of the Environmental Protection Act [415 ILCS 5/4(i), 21(d), 22, 27, 28].

C) Scheduled meeting/hearing dates:

No meetings or hearings are scheduled at this time. Once the proposal is filed, the Board will conduct hearings in accordance with Sections 27 and 28 of the Act [415 ILCS 5/27, 28].

D) Date Agency anticipates First Notice:

corporations will not be affected by the proposal unless they receive municipal waste for transfer prior to treatment or disposal. For those that do, the substantive changes in requirements for design, construction and operation are expected to be minimal with many existing transfer stations already in compliance with most of the standards and requirements. However, there may be some expense for upgrading existing transfer stations.
