ORDER OF THE BOARD (by D. Satchell):

On April 9, 1981 Travenol Laboratories, Inc. (Travenol) filed a motion for modification of the Board's Order of March 5, 1981 which granted a variance from Rule 702 of Chapter 3 concerning mercury discharges to sewers. The motion requests, among other things, modification of the variance to require monitoring on the basis of "time weighted composites" and to judge compliance on the basis of an annual average of these composites. The petition and recommendation did not address monitoring and averaging in detail. The Board asks that Travenol provide within fourteen days of the date of this Order, further information on the meaning of "time weighted composite." The Board will withhold ruling on the motion pending receipt of this information. Travenol's request for a hearing on the motion is denied.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 14th day of May, 1981 by a vote of 5-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
