General Comments:

On January 11, 2007 at 11:52 A.M., I conducted an inspection at the G & D Salvage facility, located at 104 West Lincoln – P.O. Box 386, Loda, Illinois 60948, phone number 217/386-2852.

This inspection was conducted in response to complaints first alleging that a large amount of refuse had been accumulated on site on January 7, 2008 that the complainant suspected would be open burned and then that the open burning of the reported waste was indeed occurring on January 11, 2008.

The purpose of this inspection was to determine regulatory status and evaluate compliance with the Illinois Environmental Protection Act (Act) and Title 35 Illinois Administrative Code, Subtitle G: Land Pollution (Regulations). The inspection consisted of walking around the site, taking pictures, and talking to Mr. Gene Breeden, Owner. The weather was partly cloudy, the temperature 32 degrees.

Background:

This facility was first inspected by Kent Johnson, IEPA inspector, on November 16, 1994 resulting in the site being cited for open burning of used tires and refuse. An Administrative Warning Notice dated January 11, 1995, was sent to Mr. Gene Breeden Sr. Mr. Breeden responded in a letter received by the Agency on January 30, 1995 stating that “burning had stopped completely”. The site was re-inspected on December 7, 1995 and all violations were noted as “technically resolved” in an IEPA letter dated May 24, 1996.

The site was inspected again on April 2, 2003 and cited for used tire violations and open dumping of apparent used oil resulting in a Violation Notice dated May 9, 2003 being sent to Mr. Gene Breeden. He responded in a letter received by the agency on May 19, 2003 providing information that he believed he had returned the site to compliance. His Compliance Commitment Agreement was accepted by the Agency in a letter dated May 30, 2003.

The site was inspected by Curt White, IEPA Inspector, on April 25, 2006, in response to a complaint that used tires were being open burned. While no used tires were observed being open-burned, other waste was observed being open-burned. An Administrative Citation, dated May 19, 2005, was served on Mr. Gene Breeden Sr. for a penalty of \$3000.00.

The IPCB ordered the fine to be paid by August 8, 2005. The penalty was paid in July of 2005.

I inspected the site on March 7, 2007 in response to a complaint that open burning was occurring and the facility was served an Administrative Citation, dated 03/30/07 in the amount of \$6000.00. The penalty has been paid.

Inspection:

When I arrived at the site I drove along the east fence toward the south end of the facility where the waste was reportedly being open-burned. As I neared the south fence I could see smoke billowing from a large pile of refuse over toward the center of the south end of the facility (see photos #1 and #2).

I turned the vehicle around and proceeded back toward the office when I noticed that the east gate was open. I drove into the facility and started toward the area where I had observed the smoke.

As I drove, a truck coming from the opposite direction stopped and I recognized the driver as Mr. Gene Breeden, the facility owner, so I also stopped. He asked if I had stopped in at the office and I said I had not since the gate was open. He said "you usually do". I replied that I had seen the smoke and needed to investigate the source. He said that vandals had set the fire and that both the County inspectors and the fire department had been there. I said the fire should have been extinguished.

We had a short discussion about the possibility of a penalty in which I replied that there was a strong possibility of a penalty given the past history of the site. He said he had paid a penalty last year and he believed that he would fight any penalty imposed for this occurrence. I said that was his right and that if he lost the cost would be the addition of hearing costs. I also told him the hearing would be held in the county. He said to stop at the office before I left the site and left.

I drove south then west to the area where I had observed the smoke rising from the refuse pile. I saw a large pile of refuse, measuring approximately 40' x 10' x 10', that looked like metal, scraps of dimensional lumber, plastic, and insulation as might be expected from demolishing mobile homes as well as residue from open burning of the waste. The pile had smoke billowing up from its entire length (see photos #3, #4, #6, #7, #8, and #9) indicating fire was present. There was also one spot in the approximate center of the pile on the south side where visible fire was present (not visible in photos) with flames approximately 18 inches high. To the southwest side of the pile of smoking refuse there was a smaller pile of the same type of refuse that had no evidence of fire visible (see photo #5).

I went back to the office where Mr. Breeden and I again discussed the burning debris. He said he had been vandalized with windows broken out of vehicles and he was sure vandals had started this fire. He said the fire department from Watseka had been there. I again told him that who started the fire did not matter, that it must be prevented. I also pointed out some additional waste scattered around the site near the building and said that waste needed to be cleaned up and properly disposed also. I also said that any oil spilled should be quickly scooped up and properly disposed. He said they would scoop up the waste and properly dispose of it at a landfill.

I left the site at 12:23 pm.
