Dear Illinois Pollution Control Board,

I am writing asking you to deny Peoria Disposal Company's delisting electric arc furnace dust (AS 2008-010). The delisting is a door expansion of the landfill, an expansion both Peoria County and the IPCB have already denied. The safety of what PDC is proposing cannot be assured—PDC conducted no assessment of the impact on its existing landfill, the process details are not available for review, the testing was very limited, no independent labs verified the results, and no on-site testing was conducted at the landfills where the material will be disposed. PDC's proposal simply shifts the risks to safe drinking water to communities over the Mahomet aquifer instead of the San Koty. Please work with the citizens of Central Illinois to begin the process of truly closing this unwanted legacy and eliminating further risks to the health and safety of our community.

To the Members of the Illinois Pollution Control Board,

STATE OF ILLINOIS
Pollution Control Board

As a member of Heart of Illinois Group Sierra Club, I am
concerned about the precedent being set if Peoria Disposal
Company is granted delisting of Electric Arc Furnace Dust waste.
There has been no independent testing of the new treatment
process PDC claims is safe. Their own testing occurred only in
December 2007 and February 2008, yet this waste could be in
our local landfills, including ones over the Mahomet Aquifer, forever.
I am concerned about dioxins, furans, mercury, and other heavy
metals eventually from this waste. If delisting is granted, PDC will
be able to send their treated EAF to any municipal waste landfill
in Illinois. I believe this violates factors of the IL Environmental
Protection Act, which require considerations of existing physical
conditions, receiving body of water and other issues. I am strongly
opposed to this delisting request and urge that it be denied.

SEP 11 2008

Dear Illinois Pollution Control Board,

I am writing asking you to deny Peoria Disposal Company's delisting of electric arc furnace dust (AS 2008-010). The delisting is a door expansion of the landfill, an expansion both Peoria County and the IPCB have already denied. The safety of what PDC is proposing cannot be assured—PDC conducted no assessment of the impact on its existing landfill, the process details are not available for review, the testing was very limited, no independent labs verified the results, and no on-site testing was conducted at the landfills where the material will be disposed. PDC's proposal simply shifts the risks to safe drinking water to communities over the Mahomet aquifer instead of the San Koty. Please work with the citizens of Central Illinois to begin the process of truly closing this unwanted legacy and eliminating further risks to the health and safety of our community.
