

RECEIVED  
CLERK'S OFFICE

To the Members of the Illinois Pollution Control Board  
SEP 17 2008

As a member of Heart of Illinois Group Sierra ~~STATE OFFICE~~ and greatly  
concerned about the precedent being set if ~~POLLUTION CONTROL BOARD~~  
Company is granted delisting of Electric Arc Furnace Dust waste.  
There has been no independent testing of the new treatment  
process PDC claims is safe. Their own testing occurred only in  
December 2007 and February 2008, yet this waste could be in  
our local landfills, including ones over the Mahomet Aquifer, forever.  
I am concerned about dioxins, furans, mercury, and other heavy  
metals leaching from this waste. If delisting is granted, PDC will  
be able to send their treated EAF to any municipal waste landfill  
in Illinois. I believe this violates factors of the IL Environmental  
Protection Act, which require considerations of existing physical  
conditions, receiving body of water and other issues. I am strongly  
opposed to this delisting request and urge that it be denied.

Dear Illinois Pollution Control Board,

I am writing asking you to deny Peoria Disposal Company's (PDC) permit to delist electric arc furnace dust (AS 2008-010). The delisting is a back door expansion of the landfill, an expansion both Peoria County and the IPCB have already denied. The safety of what PDC is proposing cannot be assured—PDC conducted no assessment of the impact on its existing landfill, the process details are not available for review, the testing was very limited, no independent labs verified the results, and no on-site testing was conducted at the landfills where the material will be disposed. PDC's proposal simply shifts the risks to safe drinking water to communities over the Mahomet aquifer instead of the San Koty. Please work with the citizens of Central Illinois to begin the process of truly closing this unwanted legacy and eliminating further risks to the health and safety of our community.
