If the acting Director would like to review IEPA -vs- Nokomis Quarry Company of Illinois, PCB 73-241 Page #2 concerning processing wieght. Although the case is from 1974 it is very enlightening as to the weight of material fugitive as the result of processing, and the scope of "real" inspection as it existed then. This may aid in making a decision to here PCB 2009-045, and shed light on the current Air pollution Permit systems inadequacy, and non existant waste accountability.

Sincerely
