

ILLINOIS POLLUTION CONTROL BOARD
March 25, 1976

IN THE MATTER OF THE WATER)
POLLUTION REGULATION OF ILLINOIS)
RELATIVE TO THE AMMONIA NITROGEN) R76-3
CONTENT OF EFFLUENTS)
)

ORDER OF THE BOARD (by Mr. Dumelle):

Since the Petition for Amendments to the Water Pollution Regulations, filed February 2, 1976, does not contain 200 or more signatures, its proposal by the Board is wholly discretionary with the Board. On February 19, 1976 the Board requested the Environmental Protection Agency to review the subject Petition and advise the Board whether sufficient merit exists for (a) the Agency to propose the Petition as a regulation under its own authority or (b) the Agency to recommend that the Board do so. The Agency filed its response on March 25, 1976, advising the Board that the Agency would not propose the Petition as its own. The Agency further recommended that the Board not propose the Petition under its own authority. Additionally, the Agency does not at present have the manpower and resources to apply extensive technical input into the matter. Since the Petition contains material with which the Board is not fully familiar, the Board chooses not to propose the requested regulation for public hearings.

The Petition is dismissed without prejudice.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted on the 25th day of March, 1976 by a vote of 5-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
