

ILLINOIS POLLUTION CONTROL BOARD

October 25, 1973

SKOKIE TRUCK REPAIR,)
)
 Petitioner,)
)
 v.) PCB 73-310
)
 ENVIRONMENTAL PROTECTION AGENCY,)
)
 Respondent.)

OPINION AND ORDER OF THE BOARD (by Mr. Henss)

On July 31, 1973 Skokie Truck Repair filed a petition for variance to allow connection of a new sanitary sewer to an existing sewer line. Petitioner alleged that a septic system servicing its business was no longer operable and that the connection was necessary if the business was to continue to operate. The petition was inadequate in that it failed to state the number of employees at the business site, the estimated quantity of sewage to be discharged through the proposed connection and the name of the sewage treatment plant to which the sewage would flow. On August 9, 1973 this Board ordered Petitioner to supply this additional information within 35 days.

Petitioner has failed to provide the additional information and, in fact, has not responded to our Order in any manner. Since the petition is inadequate and there has been a failure to comply with the Board Order or to otherwise prosecute the case, we are compelled to dismiss the petition without prejudice.

The petition for variance is hereby dismissed without prejudice.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted this 25th day of October, 1973 by a vote of 5 to 0.

Christan L. Moffett
