On December 17, 2009, the Board in docket R06-20(A) adopted a second notice opinion and order proposing to amend its used oil management standards and special waste regulations. Proposed Amendments to the Board's Special Waste Regulations Concerning Used Oil: 35 Ill. Adm. Code 739, 808, 809, R06-20(A) (Dec. 17, 2009). The Board's opinion noted that first-notice comments had suggested adding definitions of "Btu" and "wastewater" at Section 808.110. Because the Board's first notice opinion and order in docket A had not included that section, the Board opened this subdocket B in order to provide first notice publication of the proposed definition.

SUBPART A: GENERAL PROVISIONS

Section 808.110 Definitions

"Act" means the Environmental Protection Act (~~Ill. Rev. Stat. 1989, ch. 111 1/2, pars. 1001 et seq.~~).

"Agency" means the Illinois Environmental Protection Agency.

"Btu" or "British thermal unit" means the quantity of heat required to raise the temperature of one pound of water one degree Fahrenheit.

"Board" means the Illinois Pollution Control Board.

"Carcinogen" means a chemical, or complex mixture of closely related chemicals, which has been determined in accordance with USEPA Guidelines for Carcinogenic Risk Assessment, incorporated by reference at Section 808.111, to have either sufficient or limited human evidence or sufficient animal evidence supporting a causal association between exposure to the chemical and an increase in incidence of benign or malignant neoplasms or substantial decrease in the latency period between exposure and onset of neoplasms.

"Declassified waste" means a waste which has been determined pursuant to Section 808.245 to not be a special waste.

"Degree of hazard" is determined pursuant to Section 808.245.

"Hazardous waste" or "RCRA hazardous waste" is as defined in 35 Ill. Adm. Code 721.

"LC₅₀" means that concentration of a substance administered to test

organisms that is lethal to 50 percent of a population of exposed organisms in a given time period. "Inhalation rat" means that the substance is administered by inhalation and the test organisms are laboratory rats. "Aquatic toxicity" means that the substance is administered in water to specified free-swimming test organisms.

"LD₅₀" means that dose of a substance administered to test organisms that is lethal to 50 percent of a population of exposed organisms in a given time period. "LD₅₀-oral rat" or "oral rat" means that dose of a substance, administered orally, that is lethal to 50 percent of a population of exposed rats in a given time period.

"Mutagen" means a chemical, or complex mixture of closely related chemicals or ionizing radiation which has been determined, in accordance with USEPA Guidelines for Mutagenic Risk Assessment, incorporated by reference at Section 808.111, to have sufficient evidence supporting a causal association between exposure to the chemical and point mutations (i.e., submicroscopic changes in the base sequence of DNA) or structural or numerical chromosome aberrations. Structural aberrations include deficiencies, duplications, insertions, inversions, and translocations, whereas numerical aberrations are gains or losses of whole chromosomes (e.g., trisomy, monosomy) or sets of chromosomes (haploidy, polyploidy).

"Special handling waste" is a declassified waste which, due to its form and mode of containment in transport or storage, presents a danger to a person handling the waste such that the person needs information about the waste to safely transport or store the waste. "Special handling waste" includes any such waste which would pose a danger if handled in a manner similar to household waste. "Dangers" include, but are not limited to, the following: fire, explosion, and emission of toxic or carcinogenic gas or dust. "Special handling waste" also includes any special waste which, because of appearance or packaging, resembles waste which would be a special handling waste. Such waste includes, but is not limited to, any special waste contained in a sealed drum. Irrespective of its degree of hazard ranking under Section 808.245, a special handling waste is a special waste.

BOARD NOTE: Section 808.245(d) provides that special handling waste which would otherwise be declassified is at least a Type B special waste

ILLINOIS REGISTER

POLLUTION CONTROL BOARD

NOTICE OF ADOPTED AMENDMENT

"Special (non-RCRA) waste" is any special waste that is not hazardous waste as defined in this Section.

"Special waste" means any hazardous waste, and any industrial process waste or pollution control waste which has not been declassified pursuant to Section 808.245. (Section 3.45 of the Act.)

Board Note: The definition of "hazardous waste" at Section 3.15 of the Act differs from the definition of the same term as used in this Part. The Board intends that the Section 3.15 definition apply to this Part only for the purposes of this definition of special waste. The Board intends that the definition given in this Section apply to all other appearances for the term "hazardous waste" throughout this Part.

"TC₅₀" means that dose of a substance administered to test organisms that produces toxic effects in 50 percent of a population of exposed organisms in a given time period. "TD₅₀-oral rat" means that the test organisms are laboratory rats.

"Washwater", as used in this Subpart, means a mixture of water, nonhazardous cleaning compounds, and residue that results from cleaning surfaces and equipment and that is collected separately from sewage.

"Wastewater", as used in this Subpart, means ~~sewage, industrial waste, or other waste, or any combination of these, whether treated or untreated,~~ plus any admixed land runoff stormwater, surface water, groundwater or nonhazardous washwater that has been contaminated with used oil but has not been mixed with sewage, industrial waste or any other waste.

SUBPART A: DEFINITIONS

Section 739.100 Definitions

Terms that are defined in 35 Ill. Adm. Code 720.110, 721.101, and 731.112 have the same meanings when used in this Part.

“Aboveground tank” means a tank used to store or process used oil that is not an underground storage tank, as defined in 35 Ill. Adm. Code 280.12.

BOARD NOTE: This definition is different from the definition for “aboveground tank” given in 35 Ill. Adm. Code 720.110. Although the meanings are similar, the

ILLINOIS REGISTER

POLLUTION CONTROL BOARD

NOTICE OF ADOPTED AMENDMENT

main distinction is that the definition for this Part limits the tanks to those used to store or process used oil, whereas the 720.110 definition contemplates tanks that contain hazardous wastes. This definition of aboveground tank is limited to this Part only.

“Classification”, as used in this Part, means a short description of the waste generating activity and designation as either hazardous waste with the appropriate hazardous waste code, nonhazardous used oil, nonhazardous used oil mixture, or nonhazardous other special waste.

“Container” means any portable device in which a material is stored, transported, treated, disposed of, or otherwise handled.

“Do-it-yourselfer used oil collection center” means any site or facility that accepts or aggregates and stores used oil collected only from household do-it-yourselfers.

“Existing tank” means a tank that is used for the storage or processing of used oil and that is in operation, or for which installation had commenced on or prior to October 4, 1996. Installation will be considered to have commenced if the owner or operator had obtained all federal, state, and local approvals or permits necessary to begin installation of the tank and if either of the following had occurred:

A continuous on-site installation program had begun, or

The owner or operator had entered into contractual obligations that cannot be canceled or modified without substantial loss for installation of the tank to be completed within a reasonable time.

BOARD NOTE: This definition is similar to the definition for “Existing tank system” in 35 Ill. Adm. Code 720.110. Although the meanings are similar, the definition given above for “existing tank” in this Part limits the tanks to those used to store or process used oil, whereas the 720.110 definition contemplates tanks systems that contain hazardous wastes. This definition of existing tank is limited to this Part only.

“Household ‘do-it-yourselfer’ used oil” means oil that is derived from households, such as used oil generated by individuals who generate used oil through the maintenance of their personal vehicles.

BOARD NOTE: Household “do-it-yourselfer” used oil is not subject to the State’s

ILLINOIS REGISTER

POLLUTION CONTROL BOARD

NOTICE OF ADOPTED AMENDMENT

special waste hauling permit requirements under Part 809.

“Household ‘do-it-yourselfer’ used oil generator” means an individual who generates household “do-it-yourselfer” used oil.

“New tank” means a tank that will be used to store or process used oil and for which installation had commenced after October 4, 1996.

BOARD NOTE: This definition is similar to the definition given for “New tank system” given in 35 Ill. Adm. Code 720.110. Although the meanings are similar, the definition given above for “new tank” in this Part limits the tanks to those used to store or process used oil, whereas the 720.110 definition contemplates new tanks systems that contain hazardous wastes. This definition of new tank is limited to this Part only.

“Petroleum refining facility” means an establishment primarily engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, and lubricants, through fractionation, straight distillation of crude oil, redistillation of unfinished petroleum derivatives, cracking, or other processes (i.e., facilities classified as SIC 2911).

“Processing” means chemical or physical operations designed to produce from used oil, or to make used oil more amenable for production of, fuel oils, lubricants, or other used oil-derived product. Processing includes, but is not limited to the following: blending used oil with virgin petroleum products, blending used oils to meet the fuel specification, filtration, simple distillation, chemical or physical separation, and re-refining.

“Re-refining distillation bottoms” means the heavy fraction produced by vacuum distillation of filtered and dehydrated used oil. The composition of still bottoms varies with column operation and feedstock.

“Tank” means any stationary device, designed to contain an accumulation of used oil that is constructed primarily of non-earthen materials (e.g., wood, concrete, steel, plastic) which provide structural support.

“Used oil” means any oil that has been refined from crude oil or any synthetic oil that has been used and as a result of such use is contaminated by physical or chemical impurities.

POLLUTION CONTROL BOARD

NOTICE OF ADOPTED AMENDMENT

“Used oil aggregation point” means any site or facility that accepts, aggregates, or stores used oil collected only from other used oil generation sites owned or operated by the owner or operator of the aggregation point, from which used oil is transported to the aggregation point in shipments of no more than 55 gallons. Used oil aggregation points may also accept used oil from household do-it-yourselfers.

“Used oil burner” means a facility where used oil not meeting the specification requirements in Section 739.111 is burned for energy recovery in devices identified in Section 739.161(a).

“Used oil collection center” means any site or facility that is registered by the Agency to manage used oil and accepts or aggregates and stores used oil collected from used oil generators regulated under Subpart C of this Part that bring used oil to the collection center in shipments of no more than 55 gallons under the provisions of Section 739.124. Used oil collection centers may also accept used oil from household do-it-yourselfers.

“Used oil fuel marketer” means any person that conducts either of the following activities:

Directs a shipment of off-specification used oil from their facility to a used oil burner; or

First claims that used oil that is to be burned for energy recovery meets the used oil fuel specifications set forth in Section 739.111.

“Used oil generator” means any person, by site, whose act or process produces used oil or whose act first causes used oil to become subject to regulation.

“Used oil processor” means a facility that processes used oil.

“Used oil transfer facility” means any transportation-related facility including loading docks, parking areas, storage areas, and other areas where shipments of used oil are held for more than 24 hours and not longer than 35 days during the normal course of transportation or prior to an activity performed pursuant to Section 739.120(b)(2).
