**Subject: Joseph Melvin
1169 Old DuQuoin Road
DuQuoin, IL 62832**

On October 28, 2010, an inspection was performed at the above-referenced location. This inspection was made as a follow up regarding open dumping occurring on this property. Weather conditions were approximately 65 degrees, sunny and slightly windy.

The information obtained from the Perry County Assessor's Office indicates that the property is owned by Joseph Melvin. The site address is 1169 Old DuQuoin Road, DuQuoin, IL 62832. The property record card identifies this property as parcel number 1-61-0340-190. in Section 22, Township 06, Range 01. It is further described as part of the SE half of the NW half of Section 22, Township 06, Range 01 and contains .50 acres.

To arrive at the site, take Old DuQuoin Road south at the intersection of Old DuQuoin Road and Jackson Street. The property is about .25 miles south of Lively Subdivision and sites on the West side of the road. The GIS coordinates indicate 38°01.869N and 089°14.333W with an accuracy of 108 feet.

I arrived at the site at 12:10 p.m. I walked and photographed the site.

Photos 001 through 004 depict the areas of the property as you enter it from the driveway. The areas are covered with construction/demolition debris, white goods, used/waste tires and refuse and debris. At the time of the inspection all the items were open dumped on the ground, with the exception of some of the debris pictured in Photo 001, which is stored on a wooden structure; however, the items are being stored out in the open and not being protected from the elements for any future use. None of the items were in use and/or usable in their current condition; nor, were they being stored in such a way as to protect them for any future use. The used/waste tires were open dumped on the ground and not being stored in such a way that would prevent them from holding precipitation. The white goods are being stored out in the elements and not being protected for future use.

Photos 005 through 012 depict the inner area of the property. The area is covered with construction/demolition debris, plumbing waste, pipes, scrap, used/waste tires, refuse and debris, and white goods. Photo 009 depicts not only construction debris and scrap, but also a gutted and stripped trailer, which is being used to store additional refuse and debris; however, all the windows are out of the trailer and portions of the trailer have been removed so that the items being stored in the trailer are not being stored in such a manner as to protect them from the elements or for any future use. None of the debris was in use and/or useable in its current condition; nor, were they being stored in a manner that would protect them for any future use.

Photos 013 and 014 depict piles of used/waste tires which are open dumped on the ground and are not being stored in a manner which would prevent them from holding precipitation. It is estimated that there are at least 100 used/waste tires depicted Photos 013 and 014.

Photos 015 and 016 depict areas in the inner portion of the property. The areas are covered with debris, refuse and construction/demolition debris. The items are open dumped on the ground, are not being used and/or usable in their current condition and are not being stored in such a manner as to protect them for any future use.

Photos 017 and 018 depict the outside of the gutted, stripped trailer from the outside of the property. There is refuse, debris and construction/demolition debris open dumped in the area which is not in use and/or not usable in its current condition and is not being stored in such a manner as to protect it for any future use.

Photos 019 and 020 depict additional tires and scrap open dumped on the property. The items are not in use and/or usable in their current condition and are not being stored in such a manner as to protect them for any future use. The tires are open dumped on the ground and are not being stored in a manner which would prevent them from holding precipitation.

Photos 021 through 025 depict additional areas of the property where refuse, debris and construction/demolition debris have been open dumped on the ground. These items are not in use and/or usable in their current condition and are not being stored in such a manner as to protect them for any future use.

Almost the entire .50 acres is littered with debris and refuse of various forms; further, it is estimated that there are 200 used/waste tires open dumped on the property.

My inspection ended at approximately 12:25 p.m.
