BEFORE THE ILLINOIS POLLUTION CONTROL BOARD

IN THE MATTER OF:)
)
PETITION OF GREIF, INC. AND) AS 2011-001
GREIF PACKAGING, LLC)
FOR AN ADJUSTED STANDARD FROM) (Adjusted Standard – Air)
35 ILL ADM. CODE PART 218)
SUBPART TT)

PROOF OF PETITION NOTICE REQUIREMENTS

Pursuant to 35 Ill. Adm. Code Sections 104.408 and 104.410, on January 27, 2011, petitioners Greif, Inc. and Greif Packaging, LLC ("Greif") published notice of the filing of their Petition for an Adjusted Standard ("Petition") by advertisement in a newspaper of general circulation in the area of Greif's Naperville plant. In support of this filing Greif states the following:

1. Greif filed the Petition with the Clerk of the Illinois Pollution Control Board on January 24, 2011.
2. Pursuant to the Petition, Greif seeks an adjusted standard from 35 Ill. Adm. Code § 218.986(a) as it applies to control requirements for emissions of volatile organic material at Greif's fiber drum manufacturing facility located in Naperville, Illinois.
3. On January 27, 2011, Greif published notice of the filing of the Petition by advertisement in the *Naperville Sun*, a newspaper of general circulation in Naperville, Illinois.
4. As required by 35 Ill. Adm. Code Section 104.408(a), Greif published notice of the filing of the Petition within 14 days after it filed the Petition.
5. The notice includes the specific language required by 35 Ill. Adm. Code Section 104.408(b).

6. As required by 35 Ill. Adm. Code Section 104.410, a certificate of publication issued by the publisher of the *Naperville Sun* certifying publication of the notice on January 27, 2011 is attached as Exhibit 1. The certificate of publication attaches Greif's notice as it appeared in the *Naperville Sun* and states that the *Naperville Sun* satisfies the requirements of the Illinois Notice by Publication Act, 715 ILCS 5/0.01, *et seq.* The language included in Grief's notice is consistent with 35 Ill. Adm. Code Section 104.408(b).

WHEREFORE, for the reasons stated above, Greif has satisfied the requirements for providing notice of the filing of its Petition for an Adjusted Standard and for filing proof of such notice with the Illinois Pollution Control Board.

Respectfully submitted,

GREIF, INC. and GREIF PACKAGING, LLC

Exhibit 1

Electronic Filing - Received, Clerk's Office, February 10, 2011

Notice of Petition by Greif Inc. and Greif Packaging LLC for an Adjusted Standard before the Illinois Pollution Control Board

On January 24, 2011, Greif, Inc. and Greif Packaging LLC (Greif) filed a Petition for an Adjusted Standard (Petition) with the Illinois Pollution Control Board (Board), Docket Number 2011-001 seeking an adjusted standard from 35 Ill. Adm. Code § 218.986(a) as it applies to control requirements for emissions of volatile organic material (VOM) at Greif's facility located at 5 South 220 Frontenac Road, Naperville, Illinois 60563. Greif's Naperville facility manufactures fiber (paper) drums. Greif conducts quality control (QC) testing of polyethylene liners included in some drums by spraying a QC test fluid (a denatured alcohol product, which is a VOM) into the drum interior. The drums are conveyed to an inspection station for visual inspection and then conveyed to a third location for evaporation and removal of the QC test fluid. VOM is emitted throughout the QC Test Process, including drum conveyance. Section 218.986(a) would require Greif to install capture and control equipment which achieves an overall reduction in uncontrolled VOM emissions of at least 81% throughout Greif's QC Test Process. Greif's proposed adjusted standard requires the following: 1. Greif will reduce VOM emissions from its QC Test Process by 55% by using a test fluid composed of 45 percent denatured alcohol and 55 percent water; 2. Greif will coordinate with the Illinois Environmental Protection Agency (Agency) to submit to the United States Environmental Protection Agency a request for revision of the Illinois State Implementation Plan consistent with this proposed adjusted standard requiring use of the diluted QC test fluid as an alternative to capture and control technology; 3. Environmental staff of Greif's parent will conduct a formal training session for Naperville facility personnel on the requirements of Greif's Federally Enforceable State Operating Permit (FESOP) and the internal procedures for tracking compliance with conditions of the FESOP; 4. Greif will continue to implement an improved system for monthly tracking and calculations of VOM emissions and monthly comparison of the calculations to VOM limits contained in its FESOP. The results of the comparison will continue to be reported to Greif's facility management monthly so that any deviations or exceedances of FESOP conditions can be identified and timely reported to the Agency as required by the FESOP. Greif's Petition justifies adoption of the adjusted standard based on the following: (1) the factors relating to Greif, particularly Greif's ability to manage VOM emissions by dilution of its QC test fluid and the engineering complexities of constructing capture equipment over an extended conveyor line, are substantially and significantly different from factors relied on by the Board in adopting Section 218.986(a); (2) the costs of complying with Section 218.986(a) exceed those considered by the Board in setting the requirements of that section; (3) the requested standard will not result in adverse health effects; and (4) the requested standard is consistent with federal law. Any person may cause a public hearing to be held in the above-described adjusted standard proceeding by filing a hearing request with the Illinois Pollution Control Board within 21 days after the date of the publication of this notice. The hearing request should clearly indicate the docket number for the adjusted standard proceeding, as found in this notice, and must be mailed to the Clerk of the Board, Illinois Pollution Control Board, 100 W. Randolph Street, Suite 11-500, Chicago, Illinois 60601.
