RE: R12-11 (Rulemaking-procedural) Public Comment

Dear Sirs:

As State Representative of the 79th District, I support the Petition of the residents of Peotone and agree that registered or certified mail notification for applications to exceed agronomic rates should be put into law.

I also agree that a good compromise between rural and urban areas could be that verification that the applicant has given notice by registered or certified mail to the owners of all real property located within 250 feet of the boundaries of the proposed site and the 10 nearest residences within 1 ½ miles of the boundaries of the proposed site.

As State Representative of the 79th District, I ask that you strongly consider the comments of these residents during this review period.

Respectfully,

A handwritten signature in cursive script that reads "Lisa M. Dugan".

Lisa M. Dugan
State Representative, 79th District

Dec. 8, 2011

PETITION

Illinois Pollution control board;

This petition is asking that any application to exceed "agronomic rates" (adjusted standard) give written notice by certified or registered mail to all property owners within 1 1/2 mile of boundary's of the site. Or at least match the law for composting facilities. (Owners of all real property located within 250 feet of the site of the facility.) 30 days prior to application date and publication in the nearest paper in general circulation. So affected residents and property owners have time to address concerns and comments, public hearing, etc.
