Jun 27, 2012

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. I hope you will reject the company's request for a variance and instead hold the company to the standard passed in 2006 and the agreement it made to reduce mercury pollution. I believe this is critical for my health and the health and environment of all of Illinois.

Sincerely,

Mr. Thomas Bauer

I believe this is critical for my health and the health and environment of all of Illinois.

I work for a solar PV developer based in Chicago. We install large commercial scale PV systems, and are doing it cost-competitively in Illinois. If Ameren can't update their coal plants to comply with the current regulations, these plants need to be shuttered, and new alternatives need to be looked at. Preferably, alternatives like solar energy that do not generate green-house gases, and do provide good paying work for Illinois electricians.

Sincerely,

Mr. J.S. Roy

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Jun 27, 2012

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. I hope you will reject the company's request for a variance and instead hold the company to the standard passed in 2006 and the agreement it made to reduce mercury pollution. I believe this is critical for my health and the health and environment of all of Illinois.

Sincerely,

Mr. garry low
