Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Jun 27, 2012

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. I hope you will reject the company's request for a variance and instead hold the company to the standard passed in 2006 and the agreement it made to reduce mercury pollution. I believe this is critical for my health and the health and environment of all of Illinois.

Sincerely,

Ms. Nancy Schumm

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In response to an outpouring of public concern over unacceptably high levels of mercury in all Illinois water bodies from deposit of air-borne pollutants and the effect of mercury on neonatal development, Illinois passed a leading mercury pollution reduction standard in 2006 that included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x).

Ameren, a major discharger of mercury at its coal-fired power plants, committed to a schedule to reduce its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the agreement, but now Ameren seeks to delay cleaning up its coal plants. Please reject the company's request for a variance and instead hold the company accountable to the standard passed in 2006 and to the agreement Ameren made to reduce mercury pollution.

It is time for Ameren to make good on its promise and for citizens of Illinois to benefit from cleaner air. I urge you to deny Ameren's request for a waiver.

Sincerely,

Ms. Susan Lannin

The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. I hope you will reject the company's request for a variance and instead hold the company to the standard passed in 2006 and the agreement it made to reduce mercury pollution. I believe this is critical for my health and the health and environment of all of Illinois.

Sincerely,

Mrs. Jennifer Cassel

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

As a Citizen who cares, I was very pleased that in 2006, Illinois enacted a leading mercury pollution reduction standard.

The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems.

Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

But now, after the State of Illinois has upheld its side of this "deal," Ameren is trying to stall cleaning up its coal plants as it promised.

I strongly urge you to reject Ameren's unwarranted request for a variance and instead hold that corporation to the standard enacted in 2006 and the agreement it made to reduce mercury pollution.

I believe this is a necessary requirement to protect my health and the health and environment of all people and other life forms in Illinois, now and for the seventh generation hence.

Sincerely,

Ms. Dolores C. Pino, B.A., J.D.
