Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Jun 28, 2012

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO2) and nitrous oxide (NOx), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO2 and NOx pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. I hope you will reject the company's request for a variance and instead hold the company to the standard passed in 2006 and the agreement it made to reduce mercury pollution. I believe this is critical for my health and the health and environment of all of Illinois.

PCB 108

Sincerely,

Mr. David Dankert

Jun 28, 2012

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made itself a LEADER in the fight to reduce emissions of mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many other severe health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is backpeddaling and seeking to delay its compliance. Amaren's requests for variance must be rejected for the sake of human health, ecosystem welfare, and untold systemic benefits that reach well beyond Illinois borders.

Sincerely,

Ms. Michele Hoffman

I believe this is critical for my health and the health and environment of all of Illinois.

I live in a highly populated area, Joliet, and I live about 5 miles away from an old coal-burning power plant that is spewing mercury and other pollutants harmful to human health, into the atmosphere. Ameren and other utility companies such as Com Ed need to put human health ahead of their profit margin.

Sincerely,

Mrs. Jenifer Garlitz
