INTERIM ORDER (by Mr. Dumelle)

The variance petition in this proceeding was filed with the Board on March 27, 1973. We find it to be inadequate and incomplete for the following reasons:

No data are given as to the effluent strength from Plant No. 1 for which a variance is desired nor is a comparison given to the applicable standard. No mention is made as to possible chemical treatment to improve Plant No. 1 performance as has been done successfully at Danville and at the North Shore Sanitary District. No data are given to substantiate the conclusions given as to the effects upon the stream or its present water quality condition (see p. 4, paragraph 6(c) of petition). No estimate is given as to the population equivalent of pending applications for connection to Plant No. 1 over the period of time until State and Federal grants are received or the effect of these new connections upon the effluent and the stream. Lastly, no mention is given as to the expiration date of the bids listed on Exhibit C as being received July 10, 1972.

The petitioner is ordered to amend the petition to reflect the above listed deficiencies within 20 days of this date. The 90 days provided by statute for a decision in the proceeding shall run from the filing of an amended petition. If an amended petition is not received within 20 days then the petition shall be subject to dismissal on grounds of inadequacy.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Interim Order was adopted on the _____ day of March, 1973 by a vote of _____.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
