Subject: Ameren's petition for variance, Docket No. PCB 2012-126

PCB 2012-126

Dear Illinois Pollution Control Board Members:

Illinois made the correct moral choice in 2006 by passing leading mercury pollution reduction standards. As a person of faith, I support this original agreement for new mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x) clean air standards. Our future generations are too important to not take these steps to prevent health-related problems in our communities.

Ameren is trying to stall cleaning up its coal plants. Their largest coal plant in Illinois, the Newton Generating Station, is seeking a five-year delay to install their pollution controls. This delay would cause another 2,000 asthma attacks and 125 premature deaths, all consequences of environmental degradation.

Please reject Ameren's petition for variance, Docket No. PCB 2012-126.

Mr. Brian Sauder
714 Arlington Ct

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Mr. John Therriault:

Illinois Pollution Control Board Members

Dear Board Members,

I object to Ameren Corporation's Petition for a Variance, Docket No. PCB 2012-126.

As an Illinois resident concerned with lung health, I strongly urge the board to REJECT Ameren's request to delay compliance with state rules that require significant cuts in dangerous sulfur dioxide emissions rates from the company's fleet of coal power plants operating in Illinois. Sulfur dioxide is a dangerous air pollutant that contributes to asthma attacks, respiratory hospitalizations, and premature deaths.

Compared to a future where Ameren complies with existing state pollution rules, granting the delay requested by the company would lead to hundreds of additional asthma attacks and scores more premature deaths. Ameren was given ample time to comply with state power plant pollution regulations, which were put in place over five years ago. Please deny the variance requested by Ameren. Illinoisans' health and lives should not be put at risk any longer!

Sincerely,
Howard Stein

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

Re: Variance, Docket No. PCB 2012-126

Dear Mr. John Therriault:

I support Ameren Energy Resources workers and their request for temporary relief (Variance, Docket No. PCB 2012-126).

I recognize AER's vital role in our local and state economy, for its energy centers provide hundreds of well-paying jobs and generate vital economic activity and tax revenues that are used to support crucial municipal services and local schools.

AER remains fully committed to clean energy standards, but simply needs more time to make the costly upgrades. Please grant this request so AER can improve air quality by achieving the cleaner emission standards without having to jeopardize jobs and livelihoods of Illinois residents.

Thank you for your consideration and for registering my comment.

Sincerely,

Re: Ameren Energy Resources Company, LLC's Petition for Variance from the Illinois Multi-Pollutant Standard PCB 12-126

Honorable Members of the Illinois Pollution Control Board:

As a trustee (city councilman) of the Village of Morton, Illinois (Peoria area), I support Ameren Energy Resources Company LLC (AER) and its request to extend the deadline for upgrading its energy stations to meet new state emission standards.

I generally support strict air quality regulations, but believe initiatives to maintain or strengthen regulations must be balanced with community and business considerations.

It is my understanding that AER does not have the financial resources to immediately meet the Illinois emission requirements. If its requested relief is not granted, I understand the company may be compelled to take drastic action and shutter some of its energy centers. That would have a direct impact on our region, where AER's Edwards Energy Center currently employs 110 people.

It is in the interest of all concerned that AER be granted an extension, and I urge the board to act accordingly. Thank you.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

M. Morgana Knight

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Jul 30, 2012

Docket No. PCB 2012-126

Dear PCB 2012-126,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

M. Susan Meiers
