Jul 31, 2012

Docket No. PCB 2012-126

Dear PCB 2012-126,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO<sub>2</sub> and NO<sub>x</sub> pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

Mrs. Cynthia Arneson  
219 S Main St

**Subject:** Ameren's petition for variance, Docket No. PCB 2012-126

Dear Illinois Pollution Control Board Members:

Illinois made the correct moral choice in 2006 by passing leading mercury pollution reduction standards. As a person of faith, I support this original agreement for new mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>) clean air standards. Our future generations are too important to not take these steps to prevent health-related problems in our communities.

Ameren is trying to stall cleaning up its coal plants. Their largest coal plant in Illinois, the Newton Generating Station, is seeking a five-year delay to install their pollution controls. This delay would cause another 2,000 asthma attacks and 125 premature deaths, all consequences of environmental degradation.

Please reject Ameren's petition for variance, Docket No. PCB 2012-126.

Ms. Kris McKinnon

**Subject:** Ameren's petition for variance, Docket No. PCB 2012-126

Dear Illinois Pollution Control Board Members:

Illinois made the correct moral choice in 2006 by passing leading mercury pollution reduction standards. As a person of faith, I support this original agreement for new mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>) clean air standards. Our future generations are too important to not take these steps to prevent health-related problems in our communities.

Ameren is trying to stall cleaning up its coal plants. Their largest coal plant in Illinois, the Newton Generating Station, is seeking a five-year delay to install their pollution controls. This delay would cause another 2,000 asthma attacks and 125 premature deaths, all consequences of environmental degradation.

Please reject Ameren's petition for variance, Docket No. PCB 2012-126.

Dear Illinois Pollution Control Board Members:

Illinois made the correct moral choice in 2006 by passing leading mercury pollution reduction standards. As a person of faith, I support this original agreement for new mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>) clean air standards. Our future generations are too important to not take these steps to prevent health-related problems in our communities.

Ameren is trying to stall cleaning up its coal plants. Their largest coal plant in Illinois, the Newton Generating Station, is seeking a five-year delay to install their pollution controls. This delay would cause another 2,000 asthma attacks and 125 premature deaths, all consequences of environmental degradation.

Please reject Ameren's petition for variance, Docket No. PCB 2012-126.

Ms. Barbara Keer

Docket No. PCB 2012-126

Dear PCB 2012-126,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO<sub>2</sub> and NO<sub>x</sub> pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

Mr. Saul Aguirre
