**Subject:** Ameren's petition for variance, Docket No. PCB 2012-126

Dear Illinois Pollution Control Board Members:

Illinois made the correct moral choice in 2006 by passing leading mercury pollution reduction standards. As a person of faith, I support this original agreement for new mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>) clean air standards. Our future generations are too important to not take these steps to prevent health-related problems in our communities.

Ameren is trying to stall cleaning up its coal plants. Their largest coal plant in Illinois, the Newton Generating Station, is seeking a five-year delay to install their pollution controls. This delay would cause another 2,000 asthma attacks and 125 premature deaths, all consequences of environmental degradation.

Please reject Ameren's petition for variance, Docket No. PCB 2012-126.

Dr. Valerie WErner  
739 Highland Avenue  
Oak Park, IL 60304

Aug 6, 2012

Docket No. PCB 2012-126

Dear PCB 2012-126,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO<sub>2</sub> and NO<sub>x</sub> pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

Mrs. Brenda Babjak  
8454 Currant Ave  
Tinley Park, IL 60487-1168

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

Ms. Savannah LeRette

Docket No. PCB 2012-126

Dear PCB 2012-126,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO<sub>2</sub>) and nitrous oxide (NO<sub>x</sub>), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO<sub>2</sub> and NO<sub>x</sub> pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

Ms. Valya Lynn Woodstock

Dear Mr. John Therriault:

Illinois Pollution Control Board Members

Dear Board Members,

I object to Ameren Corporation's Petition for a Variance, Docket No. PCB 2012-126.

As an Illinois resident concerned with lung health, I strongly urge the board to REJECT Ameren's request to delay compliance with state rules that require significant cuts in dangerous sulfur dioxide emissions rates from the company's fleet of coal power plants operating in Illinois. Sulfur dioxide is a dangerous air pollutant that contributes to asthma attacks, respiratory hospitalizations, and premature deaths.

Compared to a future where Ameren complies with existing state pollution rules, granting the delay requested by the company would lead to hundreds of additional asthma attacks and scores more premature deaths. Ameren was given ample time to comply with state power plant pollution regulations, which were put in place over five years ago. Please deny the variance requested by Ameren. Illinoisans' health and lives should not be put at risk any longer!

Sincerely,  
Jeanine Solinski  
800 South Oakley Boulevard

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

I suggest that a huge balloon full of the toxic waste coming out of those Ameren polluting stacks be released in the office of the Ameren CEO and in his family's home. Then as they gasp to breathe, they may start to understand. There is now a way using algae on the stacks to transform the toxic pollutants into something safer. We should also stop using so many electronic devices so that we lower the demand for electricity! If we all get electric cars, the electricity will be coming from Ameren and cause more demand and consequently more toxic pollution!

Sincerely,

Ms. Leslie Roberts
