INTERIM ORDER OF THE BOARD (by Mr. Dumelle)

These are all petitions for the use of copper sulfate in reservoirs used to supply drinking water. All are inadequate since they fail to give dosages in amount and frequency and resulting copper levels in the water.

No mention is made whether fish or other aquatic life exist in these reservoirs. And no reasons are given why biodegradable algicides cannot be utilized in lieu of copper sulfate.

The Agency is asked to furnish copies of Board opinions on the subject as guidance to the petitioners (City of LaHarpe, et al, PCB 72-168, August 8, 1972; City of Paris, et al, PCB 72-277, August 15, 1972).

Petitioners will have 35 days in which to file amended petitions in order to remove the inadequacies. They shall simultaneously file a waiver for 35 days to Section 38 of the Environmental Protection Act in order that the 90-day decision period shall run after the filing of the amended petition.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify that the above Interim Order of the Board was adopted on the 17th day of April, 1973 by a vote of 3-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
