ORDER OF THE BOARD (by Mr. Dumelle)

The City of Mt. Olive by a letter received March 29, 1973 requests permission to use copper sulfate to prevent algae growths in its two water reservoirs. No information is given as to frequency or amount of dosage or the resulting copper content of the water. No information is give as to the possible use of alternatives to copper sulfate.

The City of Waverly in a letter dated March 22, 1973 also asks permission to use copper sulfate but not only does not give dosage amounts or frequencies nor does it give resulting copper levels in the water. And no information is given as to why alternatives besides copper sulfate cannot be used.

Both variance applications are clearly inadequate. Mt. Olive and Waverly are given 35 days in which to amend their petitions to provide the necessary information. The Agency is asked to provide the petitioners with prior Board opinions on the subject as a guide (see City of LaHarpe, et al, PCB 72-168, August 8, 1972 and City of Paris, et al, PCB 72-277, August 15, 1972.) If the amended petition is not received within 35 days it shall be subject to dismissal. The 90 days within which the Board shall make a decision will run from the date of filing of the amended petition.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted on the 12th day of April, 1973 by a vote of 4-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
