RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Thomas Zona

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Marsda Conner  
708 Highland Ave.  
Oak Park, IL 60304

RE: PCB 2013-024

Mr. Therriault

Metro Chicago has some of the dirtiest air in the United States. Many of us have developed asthma and other health issues as a result. Coal plants are bad for us, period. There is no clean coal, and sulfur dioxide emissions from burning it are making people sick. In today's market of inexpensive natural gas and other alternatives, burning coal is inexcusable. For these reasons, I urge you to require Midwest Generation to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Monica Regan
