RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Ankit Vadher  
843 W. Adams St. Unit 511  
Chicago, IL 60607

RE: PCB 2013-024

Mr. Therriault

As an energy-environmental researcher who has been active in these matters since around the first "EARTH DAY" (April 22, 1970) going on 43 years strong now: DO NOT LET ILLINOISAN 'DIRTY' COAL PLANTS "OFF THE HOOK!" MIDWEST GENERATION MUST NOT BE GRANTED A "FREE PASS" BY THE ILLINOIS POLLUTION CONTROL BOARD (IPCB) TO POLLUTE OUR AIR FOR TWO MORE YEARS!! Midwest Generation and its parent company, Edison International, agreed in 2007 to install pollution controls at their coal-fired power plants in Will County, Waukegan, and Pekin. Midwest Generation's 'dirty' coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into our air, and making local residents sick for far too long. In order to reduce this hazardous pollution (and save lives in the "Land of Lincoln"), I urge you to require Midwest Generation to meet the already agreed-upon pollution reductions by VOTING A RESOUNDING 'NO' ON THE REQUESTED VARIANCE [FOR A TWO-YEAR EXTENSION OF ITS DEADLINE TO INSTALL POLLUTION CONTROLS]. If Midwest Generation cannot afford to honor this previous cleaner air agreement for its polluting coal plants, it should save lives by SHUTTING THEM ALL DOWN!!! What NONNUCLEAR ALTERNATIVES to 'dirty' coal-fired power plants do we have here in Illinois? [1] The full practical use of the state-of-the-art energy efficiency improvements for residential and commercial buildings, industrial facilities and processes, lighting, industrial motors, household appliances, personal computers, etc. [2] Greatly increased implementation of appropriate renewable energy technologies—local community-owned wind projects (multi-turbines or single turbines), solar photovoltaics (PVs) installed on rooftops or in parking lots, solar hot water heaters, solar agricultural process heat (for grain drying), higher-temperature solar industrial process heat, passive solar space heating and cooling, municipal solid waste landfill methane biogas power plants, farm- and community-based methane biogas co-digestion systems (with co-generation capacity), very efficient individual home woodburners, lower-temperature [ground-source or geexchange] geothermal heat pumps (GHPs) for heating and cooling buildings, and so forth.

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Judith Orr  
1529 W Farwell Ave Apt 1s  
Chicago, IL 60626

Chicago, Illinois 60601

RE: PCB 2013-024

Mr. Therriault

Let's see: clean air for Illinois and the planet, or curtail Midwest Generation's profits from dirty coal pollution.... Is there really a choice here? Please save lives in Illinois, and require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance! We who breathe the air are counting on you!

Sincerely,

Nancy Churchill
