RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Len Meyer

In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. It's not ok for Midwest Generation to make money by polluting our state. There has to be a better way for Midwest to continue to be a viable concern and not pollute our environment. At this point, until they come up with that solution, our state shouldn't be held hostage by their desire for profit.

Sincerely,

Anthony Didato

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Dana mcdermott
