RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting 'no' on the requested variance. I live within one mile of Midwest Generation and two more years of breathing dangerous toxins and having them added to my source of fresh water is two years of my life I'll never get back. I'm not willing to pay this high of a price any more. Please vote 'no' on the requested variance.

Sincerely,

Roxanne Zwier-Swanson
322 Gillett Ave.

RE: PCB 2013-024

Mr. Therriault

As an Illinois taxpayer, I am against giving any extensions for the installation of pollution controls that should already be in place! Midwest Generation has stalled on this since 2007. They probably don't even have a plan or vendor contacts for who to purchase this equipment from. If my small business made an agreement with another organization and did not meet our end, I know for certain that we would not receive the same treatment as Midwest Generation and Edison. It's time to treat them with the same expectations that a contract will be fulfilled or penalties will be put in place. Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.
