RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. So, where have all their profits gone? Your job is to represent the people. Think about it.

Sincerely,

Hans (John) Baumann

If you need any help in your decision go look at china right now the air quality from pollution is so bad they cannot even go outside right now and in utah salt lake city has such high PPM of solid pollutants they have winter inversions right here in our cleaner regulated country causing massive numbers to seek shelter wear masks and limit exposure. Dont turn my city into these already ruined urban landscapes do you job and protect the public from harm. We can all afford higher rates but we cannot afford higher health risks!
