RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Martin kraft

In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. When I have a state law or city ordinance I must face I can't get a pass because "I can't afford it". It's pretty much, oh well to bad. Why should someone get away with not following a plan they agreed to, to respect the air we breathe? I am appalled that there is even conversation thinking about letting this go for 2 more years. There are millions of people that will be exposed by this pollution. Human lungs are much more important than this companies need to rack in more profits. Please vote no when asked this question again
