RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Barbara Zechlin

RE: PCB 2013-024

Mr. Therriault

Midwest Generation and Edison International agreed to install pollution controls at their Will County, Waukegan, and Pekin plants in 2007. The sulfur dioxide their plants emit has been clinically proven to aggravate heart disease and respiratory issues and shorten lifespans. Five years is far more than enough time to install pollution controls. I urge you to vote no on their variance request and hold the coal plants to the original pollution reduction deadline. Lives are more important than Midwest Generation's bottom line.

Sincerely,

Katherine Wolf

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Leanne Lindberg  
604 W. Chicago  
Elgin, IL 60123

John Therriault
