RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Joni Geer Sell

RE: PCB 2013-024

Mr. Therriault

Shut 'em down and sell the metal for scrap. Maybe some of the scrap can be used to make a wind farm or two. Burning dead dinosaurs is not a viable business model if the only way to turn a profit is to make people sick and die. If I had a business idea that would generate a useful service plus jobs, but requires the killing of at least one random citizen a year as a human sacrifice, Then that would be considered an immoral business model, and I wouldn't even get a licence. Furthermore, if that citizen considered for assassination turned out to be a politician or business executive, then I'd end up in jail just for thinking up such a business. Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Gary Jones

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Lillian Slowinski  
3125 W 98th Place  
Evergreen Park, IL 60805
