RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Jeanne Mattes

RE: PCB 2013-024

Mr. Therriault

The Clean Air Act was intended to give us clean air. Midwest Generation's request to delay installation of sulfur dioxide control measures subverts the intent of this law and threatens public health. Sulfur dioxide control technologies are mature, commercially available, and in wide use across the country. Do not let Midwest Generation use this loophole as an excuse for their failure to deal with the problem in a timely fashion. Vote no on the requested variance.
