RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Beth Wegner
714 N 4th Street
Pekin, IL 61554

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. Coal is a filthy energy source and totally outdated. Illinois needs to get with the program and eliminate coal plants that can't or won't meet reasonable pollution guidelines.

In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. This is your public duty to protect our air not to allow companies variances from the law of the land. Auto makers screamed they would go out of business if forced to put seat belts in cars and then, they did not go out of business but many lives were saved as a result of the seatbelts. If your child lived next door to one of these plants and had to breathe that air all day long, would you be only thinking of the companies best interests? I don't believe so. Please do not allow this variance.
